Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to with stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

#### Tuesday January 3<sup>rd</sup> 2017

Today was a Buy day. Markets did produce a decline but most were a little lower than average. Then a rally started.

Tomorrow will be a Sell day. There is room for the rally to continue, however we could be in for a confused day.

Please be advised that starting today the Calculations for TTT will be based on 6PM EST to 5PM EST. Therefore the reports will be sent accordingly.

Today was a Sell day. The TTT MA rally was done so markets tested Friday's highs, then a reversal started.

Tomorrow will be a SS day. Momentum may take markets lower before a rally starts again.

## Tuesday January 10<sup>th</sup> 2017

Today was a SS day. Markets were a bit confused as some wanted to decline but NQ had to drag TF above its BDL.

Tomorrow will be a Buy day. There is plenty of room for the decline to continue.

## Wednesday January 11<sup>th</sup> 2017

Today was a Buy day. Markets declined and some reached their TTT MA levels before the rally started.

Tomorrow will be a Sell day. A good part of the rally is in place which could make for a confused day.

#### Thursday January 12<sup>th</sup> 2017

Today was a Sell day. Markets tested their BDL and even reached their Violation levels before the rally started.

Tomorrow will be a SS day. Based on averages there is plenty of room for the rally to continue. However being a SS day the decline could also start at any time.

#### Wednesday January 18<sup>th</sup> 2017

Today was a SS day. Markets had a hard time getting a rally going. Previous Day High was resistance and some BDL offered Support.

Tomorrow will be a Buy day. Markets have plenty of room to decline. Having said that there is 2 instruments that failed their 3 day rally which may try to correct this error by forgetting the decline until they reach the previous BDL. Tough one to call

Tomorrow will be a Buy day. There is plenty of room for the decline to continue.

#### Friday January 27<sup>th</sup> 2017

Today was a Buy day. Markets were confused today with some testing PH then declining and some testing PL and rallying. All in all they all produced a decline.

Monday will be a Sell day. All but NQ closed near their lows of the day, which means that momentum may take markets lower before the rally starts.

#### Tuesday January 31th 2017

Today was a SS day. Markets did try to get back up this long hill to the BDL but failed. Having said that seeing the rally of the last part of the day, I am not sure this is a real failed 3 day rally.

Tomorrow will be a Buy day. We may negate the failure of today by reaching the previous BDL before the decline starts, or by getting a small decline and then a rally. Being FOMC day anything could happen.

#### Wednesday February 1<sup>th</sup> 2017

Today was a Buy day. As expected markets tried to negate the failure of yesterday. NQ succeeded and ES was close. All this to say the decline was shallow and some kind of rally started.

Tomorrow will be a Sell day. The rally should continue but it may be in a confused way.

#### Friday February 3<sup>rd</sup> 2017

Today was a SS day. Some of the markets retested their BDL and the real rally started again.

Monday will be a Buy day. Markets closed near the highs of the day. Therefore momentum may take markets higher before the decline starts.

#### Monday February 6<sup>th</sup> 2017

Today was a Buy day. ES and TF had a different agenda then YM and NQ. They tested Friday's highs and then decline VS. YM and NQ which decline and then rallied in a confused manner.

Tomorrow will be a Sell day. I wonder who will take over the leadership, therefore we could be in for a confused day.

#### Tuesday February 7<sup>th</sup> 2017

Today was a Sell day. Well we had the same problem as yesterday with ES and TF playing with yesterday's low, while NQ and YM rallying to their TTT Targets.

Tomorrow will be a SS day. There is plenty of room for the rally to continue if they can make up their mind who is driving this market.

#### Wednesday February 8<sup>th</sup> 2017

Today was a SS day. Markets are really confused. TF failed to make 3 day rally on day session. ES retested its BDL. NQ rallied and reached its target. YM floated in the middle of its range.

Tomorrow will be a Buy day. We should be looking for a decline.

# Thursday February 23<sup>rd</sup> 2017

Today was Sell day. Markets were confused testing their previous day Low's and High's. 2 out of 4 closed below their BDL.

Tomorrow will be a SS day. Two of them need to get back to their BDL and there is room for the rally to continue.

#### Friday February 24<sup>th</sup> 2017

Today was a SS day. Markets had a hard time but they finally made it back above the BDL and created a positive 3 day rally.

Monday will be a Buy day. We should be looking for a decline on Monday. However having closed on the highs of the day, momentum may take markets higher before the decline starts.

#### Tuesday February 28<sup>th</sup> 2017

Today was a Sell day. Markets were confused with some retesting their previous day lows and trying some kind of rally

Tomorrow will be a SS day. There is plenty of room for the rally to continue, having said that as long as we open in the morning above the BDL, the decline could start at any time.

#### Wednesday March 1st 2017

Today was a SS day. Markets rallied and surpassed all levels, before the decline started.

Tomorrow will be a Buy day. There is room for the decline to continue. Having said that this rally is very bullish and declines have been shallower than averages.

## Monday March 6<sup>th</sup> 2017

Today was a SS day. Markets had to work hard to get back above the BDL and YM, ES, NQ all made it back above before the decline started.

Tomorrow will be a Buy day. There is plenty of room for the decline to continue.

#### Wednesday March 8<sup>th</sup> 2017

Today was a Sell day. Markets were very confused and only NQ closed above it's BDL.

Tomorrow will be a SS day. Markets need to get back above their BDL before a decline could start.

Tomorrow is the official rollover day, however TTT will be using the new contract only on Friday.

Today was a Sell day. Markets were confused and didn't really go anywhere.

Tomorrow will be a SS day. There is room for the rally to continue, however the decline could start at any time.

#### Tuesday March 21st 2017

Today was a Sell day. Markets had a hard time making higher highs and then a hard reversal came.

Tomorrow will be a SS day. Although we have great odds of getting back to the BDL, it will be hard to accomplish. First we closed on the lows, therefore momentum may take markets lower before a rally starts. Second, It will be a long hill to climb back.

# Wednesday March 22<sup>nd</sup> 2017

Today was a SS day. As I said last night momentum did take markets lower before the rally started. But the hill was too hard to climb.

Tomorrow will be a Buy day. In order to negate the last cycle failure markets will have to reach the previous BDL.

## Thursday March 23<sup>rd</sup> 2017

Today was a Buy day. Markets tried to rally but failed and then the decline started. Then some kind of rally started.

Tomorrow will be a Sell day. There is plenty of room for the rally to continue.

#### Friday March 24<sup>th</sup> 2017

Today was a Sell day. And what a confused day did we get. Some reached their penetration levels and then decline to yesterday's low only to bounce back again.

Monday will be a SS day. Some are close to their BDL and should at least get back above at some point on Monday. Once accomplished all bets are off and the decline could start at any time.

#### Monday March 27<sup>th</sup> 2017

Today was a SS day. Markets opened below the BDL and had to rally above as per averages. Only YM failed.

Tomorrow will be a Buy day. Having closed on the highs and since YM may want to negate its failure, markets may get higher before the decline starts.

# Tuesday April 4<sup>th</sup> 2017

Today was a SS day. All markets except TF made it above the BDL and tried to carry TF to get there.

Tomorrow will be a Buy day. Having closed on the highs and TF missing a few points, Momentum may take markets higher before the real decline starts.

#### Thursday April 6<sup>th</sup> 2017

Today was a Sell day. Markets did go lower before the rally started and some reached their TTT levels.

Tomorrow will be a SS day. We could be in for a confused day due to all sorts of news for the day. But based on TTT we have room to rally a bit more before a decline starts.

#### Wednesday April 12<sup>th</sup> 2017

Today was a SS day. Markets had declined early and only NQ day time session failed to make it above the BDL.

Tomorrow will be a Buy day. There is room for the decline to continue and having closed near the lows of the day, momentum should take markets lower before the rally starts.

#### Thursday April 13<sup>th</sup> 2017

Today was a Buy day. Markets were confused until NQ negated it's day session 3 day rally failure. Once that reversal done the decline started.

Monday will be a Sell day. Being half way through the rally, we could be in for a confused day.

#### Monday April 24<sup>th</sup> 2017

Today was a Buy day. Markets gapped up so high that there was no reversal strong enough to get back to the previous day high.

Tomorrow will be a Sell day. There is plenty of room for the rally to continue, however with this big gap up we may be in for a confused day.

Sorry I am having issues with the SPX data feed so the data is incorrect.

### Tuesday April 25<sup>th</sup> 2017

Today was a Sell day. Markets continued their rally and most surpassed all their levels.

Tomorrow will be a SS day. Only ES has room to go based on averages, however the others have surpassed their 3 day Rally averages. Therefore the decline could start at any time.

Today was a SS day. Once ES reached its TTT level, the decline started.

Tomorrow will be a Buy day. There is room for the decline to continue and having closed on the lows of the day, momentum should take markets lower before the rally starts.

#### Friday April 28<sup>th</sup> 2017

Today was a Sell day. It was confused with some rally and a decline again.

Monday will be a SS day. TF closed below its BDL and therefore we should be looking for a rally in order for it to get back above

Have a great weekend

#### Monday May 1st 2017

Today was a SS day. NQ tried to pull the others up but TF was dragging hard. ES and YM retested their BDL but couldn't get the traction that NQ had.

Tomorrow will be a Buy day. Having closed near the highs of the day, momentum may take markets higher before the decline starts. It may be enough for TF to get back above its BDL and negate its failure.

### Tuesday May 2<sup>nd</sup> 2017

Today was a Buy day. TF and NQ tested their previous day high and failed. The decline then started.

Tomorrow will be a Sell day. Since NQ has been trying to drive this market, it's momentum may take markets lower before the rally starts.

#### Wednesday May 3<sup>rd</sup> 2017

Today was a Sell day. We ended up with a confused day but all 4 did produce a rally. However TF and NQ closed below yesterday's low.

Tomorrow will be a SS day. We have good odds that all markets will be above their BDL at some point tomorrow. Maybe ES and YM will drag the other two .

#### Thursday May 11<sup>th</sup> 2017

Today was a Sell day. Markets retested their BDL and even reached their TTT Mav levels before the real rally started.

Tomorrow will be a SS day. Markets closed near their BDL, leaving plenty of room to rally, however once above the BDL for the day session, all bets are off.

#### Monday May 15<sup>th</sup> 2017

Today was a Buy day. Momentum did take markets higher before the decline started. However we didn't get a decline in most markets for the dayt session.

Tomorrow will be a Sell day. A good part of the rally is in place which could make for a confused day. Also Markets may try to correct the day session failure.

### Tuesday May 16<sup>th</sup> 2017

Today was a Sell day. Most markets rallied to their TTT levels and then got confused. Only NQ reached higher levels.

Tomorrow will be a SS day. There is room for the rally to continue if they want to, however the decline could start at any time.

#### Tuesday May 23<sup>rd</sup> 2017

Today was a Buy day. Markets declined and rallied during the overnight session. Then a second but smaller decline happened during the day session. Then a rally started.

Tomorrow will be a Sell day. Part of the rally is in place, therefore we could be looking for a confused day.

#### Wednesday May 24<sup>th</sup> 2017

Today was a Sell day. Markets were confused to start but the rally finally restarted and most reached their TTT Levels.

Tomorrow will be a SS day. There is room for the rally to continue, however since we are above the BDL, the decline could start at any time.

### Thursday May 25<sup>th</sup> 2017

Today was a SS day. Markets rallied to their Penetration levels, then stalled and maybe the decline started.

Tomorrow will be a Buy day. Since the decline is small so far, markets may retest the highs before the decline starts.

# Thursday June 1<sup>st</sup> 2017

Today was a Sell day. Markets rallied hard and surpassed their TTT levels.

Tomorrow will be a SS day. Since markets are above or at their TTT levels for tomorrow, the decline could start at any time. Having said that momentum may take markets higher before the decline starts.

#### Tuesday June 6<sup>th</sup> 2017

Today was a Sell day. As expected, momentum did take markets lower until some reached their Violation levels, then some kind of rally started.

Tomorrow will be a SS day. ES, NQ and YM did close below their BDL and should at least rally back above these levels at some point tomorrow.

## Wednesday June 7<sup>th</sup> 2017

Today was a SS day. Markets were confused and 1<sup>st</sup> got back above the BDL and then retested the Previous day Low only to rally again.

Tomorrow will be a Buy day. Today's confusion could have been due to tomorrow's rollover or we will be in for a further confusion again tomorrow.

Tomorrow's numbers are based on the old contract and tomorrow night's numbers will be based on the new contract

#### Monday June 12<sup>th</sup> 2017

Today was a SS day. Markets decline but all except NQ managed to print a positive 3 day rally.

Tomorrow will be a Buy day. We should be looking for the decline to continue. ES is a bit confused and may go higher before the decline starts.

#### Tuesday June 13<sup>th</sup> 2017

Today was a Buy day. All except ES day session produced some kind of decline, and only NQ reached its target before a rally started.

Tomorrow will be a Sell day. We should be looking for a confused day, and FOMC release won't make that easier.

#### Friday June 16<sup>th</sup> 2017

Today was a Buy day. Markets dis go higher before the decline started, and some did reach their TTT levels before rallying again.

Monday will be a Sell day. A good part of the rally is in place which again could make markets confusing.

#### Monday June 19<sup>th</sup> 2017

Today was a Sell day. Markets were definitively not confused and rallied passed their TTT targets.

Tomorrow will be a SS day. Markets closed at their 3 day rally levels, therefore the decline could start at any time. Having said that, momentum may take markets higher before that decline starts.

#### Tuesday June 20<sup>th</sup> 2017

Today was a SS day. Markets tested yesterday's highs and failed to go much higher. The decline then started.

Tomorrow will be a Buy day. ES and YM have room for the decline to continue and having closed near the lows of the day, momentum should take markets lower before the rally starts.

#### Wednesday June 21st 2017

Today was a Buy day. Markets reached their Violation levels and then all tried to follow NQ's super rally.

Tomorrow will be a Sell day. NQ is way passed its targets, however the others have a long way to go. That could get confusing.

# Thursday June 22<sup>nd</sup> 2017

Today was a Sell day. Markets were confused with NQ rallying to its levels while others couldn't get higher than yesterday's high.

Tomorrow will be a SS day. NG is way above its target and the other have room to go. Maybe more confusion ahead.

#### Friday June 23<sup>rd</sup> 2017

Today was a SS day. Markets were confused with YM going below and above its BDL multiple times, ES testing its BDL and Yesterday's highs. Therefore no real direction.

Monday will be a Buy day. There is room for the decline to continue.

#### Thursday June 29<sup>th</sup> 2017

Today was a Buy day. As expected markets did go higher before the decline started. That decline did reached the last level possible before the rally started.

Tomorrow will be a Sell day. The average rally is in place, which could make for a very confused day.

#### Friday June 30<sup>th</sup> 2017

Today was a Sell day. ES tested its Average 3 day rally level and failed, only to retest it again and fail again. That was the expected confusion.

Monday will be a SS day. It should be a slow day as Tuesday will be a holiday and most traders will be off. Having said that there is room for the 3 day rally to continue.
