Wednesday September 1st ,2010

Today was a Buy day. The bulls showed us that they want to be in charges by giving us a large gap up together with TVGR, made for a non decline buy day for the day session.

Tomorrow will be a Sell day. Markets have exceeded the average rally already, so I would expect a confusing day for tomorrow.

Thursday September 2nd ,2010

Today was a Sell day. The rally did have a small pullback this morning but continued to close to the projected Day session highs.

Tomorrow will be a SS day. We had a pretty good rally so far and projected 3 day rally numbers are achieved at the moment. Will we reach the Penetration levels or will the Job ##s kill this rally.

Today was a Buy day. Due to the shortened day we only got a small decline.
Tomorrow will be a Sell day. Short trading days often have a tendency to mess up the cycle. In principle we should get a rally tomorrow

should get a ra	ily tolli	OHOW.

Today was a Sell day and as expected only the Globex session managed to get a rally. For the day session the large gap open triggered TVGR and market drifted down all day.
Tomorrow will be a SS day and normally we should rally back to the buy day low. However after a holiday it

may be touch and go.

Today was a SS day. Markets continued the rally until they reached the targets before starting the last minute decline.

Tomorrow will be a Buy day. We did close near to the highs of the day, therefore momentum may take us higher before the real decline starts.

Tuesday September 14th ,2010

Today was a Buy day. Markets declined overnight, but rallied near the open giving us a shallow decline. So

far the rally was not very strong
Tomorrow will be a Sell day. Shallow declines are very bullish, however the weak rally so far does not back that up. Tomorrow may be a confusing day if they can't make up their mind.

Wednesday September 15th ,2010 Today was a Sell day. As expected based on yesterday's action, we did get a confusing day and we failed to reach the Sell day objectives.

Tomorrow will be a SS day. We are quite far from the 3 day Rally objectives but having closed on the highs today, momentum should take us higher.

Tomorrow will be a Buy day. Again the last minute bounce may confuse things again, however the Decline should continue lower.

Today was a Buy day. Yesterday's momentum did take the markets higher before the decline started. Some went to Violation levels and then down to the average decline levels, good day for TTT © Tomorrow will be a Sell day. The rally that started today didn't go far up yet, therefore we may go lower before the real rally starts.

Monday October 4th ,2010
Today was a SS day. Markets tried to test the previous day highs and failed. Only direction left was down.
Tomorrow will be a Buy day. A good part of the decline is in place, however the averages should take us lower before the rally can begin.

Tuesday October 5th ,2010

Today was a Buy day. Since most of the decline was done in the SS day, the rally started overnight and gave us a large gap up today, making for a very small decline for the day session and the rally continued all day helped by TVGR.

Tomorrow will be a Sell day. Based on today's action I would expect a confusing day since most of the rally

is already in place.

Friday October 8th ,2010

Today was a Buy day. Markets did reach the projected lows for the Buy day but this was accomplished during the overnight session at news time this morning.

Monday will be a Sell day. Markets did rally hard today and some have closed at the Sell day levels. This

may cause a confusing day.

Wednesday October 13th ,2010 Today was a Buy day. We did get a decline on the 24 hour session however only TF managed to get a minuscule decline for the day session

Tomorrow will be a Sell day. There is still room to go for the current rally. Based on the last hour's action we may get a confusing day.

Thursday October 14th ,2010 Today was a Sell day. As expected it was a confusing day. With this rally at the end of day it left a good stage for the SS day

Tomorrow will be a SS day. As I just said it did help to have this last minute rally in order to set up a decent 3 day rally.

Tuesday October 19th ,2010

Today was a Sell day. As expected it was a confusing day opening with a large gap down. TVGR was in effect and the stronger part of the drop came once NQ got back to the Buy day low.

Tomorrow will be a SS Day. We should get back to the Buy day low, unless TVGR sets in with another large

gap down.

Monday November 15th ,2010

Today was a SS Day. As mentioned Friday we did have good odds of at least making it back to the Buy Day Low. However after the market reached the BDL, they were not strong enough to make much of a 3 Day Rally

Tomorrow will be a Buy day. Based on today's action and the average declines, markets should continue lower before a rally can start.

Today was a Buy day. Markets really declined and passed all the levels. Considering that we barely had a 3
Day Rally yesterday, this don't look good for the bulls.
Tomorrow will be a Sell day. Momentum could take us lower before the rally starts

Friday December 10th ,2010

Today was a Buy day. The decline was shallow showing that the bulls are in charge therefore explaining the new highs.

Monday will be a Sell day. There is still room for the rally to continue but we may get a confusing day.

Today was a Sell day. The rally did continue and reached TTT levels

Tomorrow will be a SS day. There is still room for the rally to continue, and momentum should take markets higher before the decline starts.

Thursday January 20th, 2011

Today was a Sell day. As expected markets did follow the momentum before the rally started.

Tomorrow will be a SS day. Some of the instruments closed below the BDL and therefore should continue rallying, at least to that level.

Today was a SS day. Markets did show some confusion due to FOMC but still managed to reach TTT levels.

Tomorrow will be a Buy day. Markets having closed near the highs may have momentum that will delay the decline.

Friday January 28th, 2011

Today was a Sell day. ES was the only one that made a higher high and failed to go much higher. The next objective when this happens Is to go at least test the previous day low. Every one made lower lows. Monday will be a SS day. We closed at the lows of the day. Momentum may take us lower, however we have good odds to get at least back to the BDL before the close on Monday

Monday January 31st ,2011

Today was a Buy day. As expected momentum did take us lower in the overnight session, making the recovery to the Buy day Low a very hard endeavor. This is the 1st failed 3 day cycle in a long time. Tomorrow will be a Buy day. After a failed 3 day cycle we normally get either the markets try to complete the missing effort attempted on the SS day, or the decline continues.
