Friday July 1st ,2011

Today was a SS day. The rally did continue and even surpassed all TTT levels.

Monday will be a Buy day and a shortened trading day. This may affect the size of the decline that we should get and we also have momentum to deal with

Thursday July 7<sup>th</sup>, 2011
Today was a Buy day. Markets did produce a small decline in the overnight session but then opened with a large gap which triggered TVGR and the rally was on its way.
Tomorrow will be a Sell day. Most of the rally has be accomplished so we may get a confused day. Just in time for the employment situation, good timing.

Friday July 8<sup>th</sup>, 2011 Today was a Sell day. After all said and done only ES day session failed to produce a rally but they tried hard getting within 2 points of the BDL.

Monday will be a SS day. There is room to go up and ES still needs to get above the Day Session BDL.

Monday July 11<sup>th</sup>, 2011 Today was a SS day. Day session failed to get back to BDL. 24 hour session was ok. The huge gap gave us

TVGR and markets just went lower.

Tomorrow will be a Buy day. All markets closed at their respective decline levels. However will momentum take them lower before the rally can start?

Tuesday July 12<sup>th</sup>, 2011
Today was a Buy day. As expected momentum did take the markets lower to maximum TTT levels. This large move was in the overnight session, with a confused day session.
Tomorrow will be a Sell day. Due to the big difference between the 24hr and Day session BDL's we may get

a confused session.

Wednesday July 13<sup>th</sup>, 2011 Today was a Sell day and as expected it was confusing due to very different BDL between the day and 24hr session. Markets all rallied to the Day session levels only to pull back to the 24hr TTT levels.

Tomorrow will be a SS day. The same issue about large difference between BDL that we may experience

the same type of day tomorrow.

# Thursday July 14<sup>th</sup>, 2011

Today was a SS day. Markets tested yesterday's highs and failed, therefore the decline started. Tomorrow will be a Buy day. A good part of the decline is already in place and momentum should take the markets lower before the rally can start.

Monday July 18<sup>th</sup>, 2011 Today was a Sell day. Markets did manage to produce a minimal rally, however with TVGR in effect markets did do lower and bounced on the TTT Violation levels.

Tomorrow will be a SS day. At the close all except TF were at or above the BDL. Markets should try to stay above or get above the BDL for the day session tomorrow.

Tuesday July 19<sup>th</sup>, 2011 Today was a SS day. Markets did pull TF above the BDL and most made it to or close to the TTT levels for a SS day.

Tomorrow will be a Buy day. Having closed near the highs of the day, momentum may take markets higher before the decline starts.

### Wednesday July 20<sup>th</sup>, 2011

Today was a Buy day. Momentum did take the markets higher which gave nice short trades at or before the open as we knew we had high odds of at least getting below yesterday's highs.

Tomorrow will be a Sell day. Again, having closed close to the lows of the day, we may continue lower

Tomorrow will be a Sell day. Again, having closed close to the lows of the day, we may continue lower before the rally starts.

Friday July 22<sup>nd</sup>, 2011
Today was a SS day. As expected the markets did reach their TTT levels and then pulled back just to try to get back to the TTT levels again.

Monday will be a Buy day. Momentum may take the markets higher before the decline start

Today was a buy day. Markets did decline overnight and reached TTT levels. TVGR was in effect but some markets tried hard to close the gap.

Tomorrow will be a Sell day. Based on today's action we could be looking at a confusing day.

# Tuesday July 26<sup>th</sup>, 2011

Today was a Sell day. As expected it was a confused day and some instruments closed below the BDL Tomorrow will be a SS day. Markets should rally so that all of them reach at least the BDL. Having closed near the lows of the day, momentum may take markets lower and if the gap is too big in the morning, we could also be in for a failed 3 day rally.

Wednesday July 27<sup>th</sup>, 2011 Today was a SS day. As mentioned last night based on yesterday's action we could expect a failed 3 day rally and most did produce that on the day session.

Tomorrow will be a Buy day. Markets are already past TTT levels and having closed on the lows for the day, momentum may take them lower before a rally can start.

Thursday July 28<sup>th</sup>, 2011
Today was a Buy day. Markets did decline and did a fake rally just to close near the lows of the day.

Tomorrow will be a Sell day. Based on today's action, momentum may take us lower before the rally starts.

### Thursday August 4<sup>th</sup>, 2011

Today was a SS day. Markets tested yesterday's highs during the Globex session and failed and started to decline. They opened below the Buy day low and tried to rally and also failed, TVGR took effect and took the markets down all day

Tomorrow will be a Buy day. We are already way lower than the average decline levels and all levels for that matter. Momentum should take the markets lower. At this point it is impossible to predict tomorrow's action as for now the BEARs are really in charge. Maybe the News in the morning may help the bulls but who knows.

Today was a Buy day. Momentum did take the market lower before the rally could start.
Monday will be a Sell day. After the low was in place today, the markets rallied but in a confused manner.
This may continue on Monday.

Monday August 8<sup>th</sup>, 2011 Today was a Sell day. Markets opened below the BDL and rallied to get above, at which point they reversed and crashed.

Tomorrow will be a SS day. Strictly based on TTT markets should try to rally to the BDL, however the distance is so large that I don't expect that to happen, or they may just try. Very hard day to predict.

# Thursday August 11<sup>th</sup>, 2011

Today was a Sell day. Markets did decline a bit more but mainly during the Globex session. Markets then rallied

Tomorrow will be a SS day. Based on averages we have surpassed the 3 day rally levels therefore we

could get a confused day

Monday August 15<sup>th</sup>, 2011 Today was a Buy day. Bulls decided to make a comeback and opened with a gap up which created TVGR all day. The decline was very small.

Tomorrow will be a Sell day. Markets closed near the average levels for tomorrow, therefore we may get a

confused day.

Wednesday August 17<sup>th</sup>, 2011 Today was a SS day. Textbook one at that, tried to get above previous day high, failed and just at TTT levels, market had to start it's decline.

Tomorrow will be a Buy day. A good part of the decline is in, so if the bulls want to be in charge the rally could start at anytime

Friday August 19<sup>th</sup>, 2011
Today was a Sell day. Markets opened at or below the Buy day low, reversed at the Violation levels and the rallied to the Average Rally level. The bears then came back and cancelled out the rally Monday will be a SS day. The open will dictate the direction for Monday. If we open below the BDL they should try to at least get back above.

# Tuesday August 23<sup>rd</sup>, 2011

Today was a Buy day. Markets did try to the yesterday's lows and failed at which time the rally started. Tomorrow will be a Sell day. We already close above the average rally. Having also closed at the highs of the day, momentum may take markets higher. All this may also cause a confused day.

## Thursday August 25<sup>th</sup>, 2011

Today was a SS day. This was textbook SS day, made higher high at TTT penetration levels, then the decline started.

Tomorrow will be a Buy day. The decline is already in place and even past the levels. Momentum may still take the markets lower before the rally can start.

Monday August 29<sup>th</sup>, 2011 Today was a Sell day. Markets open with a good gap up, therefore triggering TVGR which was in effect all

day, pushing the markets up.

Tomorrow will be a SS day. Markets have all surpassed the projected levels. Having closed on the highs of the day, momentum may take markets higher before the decline starts.

Thursday September 1<sup>st</sup>, 2011 Today was a Sell day. Markets did rally to start the day but once they reached the TTT levels they declined hard.

Tomorrow will be a SS day. Some of the markets have closed below or at the BDL. We know that we do have good odds of at least rallying back to these levels before the close of the day tomorrow

Friday September 2<sup>nd</sup>, 2011 Today was a SS day. Although we had high odds to at least get back to the BDL, Bears took charge and opened with a very large gap down which triggered TVGR and most markets failed to get a positive 3 day rally.

Monday will be a Buy day. Based on averages the decline is in place however momentum may take markets lower before the rally can start.

Tuesday September 6<sup>th</sup>, 2011 Today was a sell day. Perfect Sell day with a test of the Buy day low and then the rally started and reached TTT levels.

Tomorrow will be a SS day. Although we are at TTT levels for tomorrow, momentum should take markets higher before the decline can start

Wednesday September 7<sup>th</sup>, 2011 Today was a SS day. Momentum did take the markets higher. Markets even gapped over all TTT levels, that combine with TVGR made for a strong rally.

Tomorrow will be a Buy day. Momentum may take markets higher before the decline start. An opening above today's high in the morning could make for a nice shorting opportunity.

Monday September 12<sup>th</sup>, 2011
Today was a SS day. Markets had a long way to get to the BDL and failed.
Tomorrow will be a Buy day. Sometimes when we get a failed 3 day rally, markets try to compensate by rallying higher on the Buy day, having closed on the highs today could create such a day.

Today was a Buy day. As expected the decline was minor and 2 of the 4 markets did manage to correct the failed 3 day rally of yesterday by climbing to the previous BDL.

Tomorrow will be a Sell day. Markets close at the average Sell day rally, therefor we could easily get a

confused day.

Today was a Sell day. As expected we had a confused day with a higher rally than expected
Tomorrow will be a SS day. We have already achieved the average 3 day rally and even more. Therefore
the decline could start at anytime

# Thursday September 15<sup>th</sup>, 2011

Today was a SS day. Markets tested yesterday's highs and failed to penetrate and therefore declined, however failing to close the gap was even more powerful which helped push the markets higher and even close higher that yesterday.

Tomorrow will be a Buy day. Having closed near the highs, momentum may take the markets higher before the decline can start

## Monday September 19<sup>th</sup>, 2011

Today was a Sell day. Markets did go much lower than the BDL. The odds of coming back to at least the BDL were extremely high and they all managed to get back to these levels

Tomorrow will be a SS day. Most markets are above the BDL and should at least get back to that level should they drop below during the overnight session.

## Tuesday September 20<sup>th</sup>, 2011

Today was a SS day. TF opened below the BDL and declined further. However we knew that there were good odds to at least come back to the BDL level markets rallied and the BDL was achieved. The SS day decline started when markets failed to stay much above the Previous day High

Tomorrow will be a Buy Day. A good part of the decline has been achieved and having closed on the lows, momentum may take the markets lower before a rally can start.

## Wednesday September 21st, 2011

Today was a Buy day. Markets did produce a larger decline than expected due to the FOMC report Tomorrow will be a Sell day. Based on the late day action, momentum may take markets lower before the rally can start. We may get a large gap down in the morning which may trigger TVGR. Caution may be needed.

Thursday September 22<sup>nd</sup>, 2011 Today was a Sell day. As I mentioned last night I was worried that we would not get a rally for the day session if we had a large gap open. They did try to rally but failed and therefore made lower lows. Tomorrow will be a SS day. Maybe the rally that got started near the end of the day will continue and reach the BDL and therefore eliminate a failed 3 day rally.

## Friday September 23<sup>rd</sup>, 2011

Today was a SS day. As expected the markets had too much to rally to get to the BDL and they all failed. As we know this is not a regular event and when we get few of these close together it could mean that the bears are back in charge.

Monday will be a Buy day. Unless the Bulls wake up over the weekend we should expect a decline.

## Monday September 26<sup>th</sup>, 2011

Today was a Buy day. The decline was smaller than expected mainly due to the failed 3 day rally from Friday which both ES and TF made it back now to the previous buy day low

Tomorrow will be a Sell day. Markets have rallied higher than the average today and therefore may make for a confused day tomorrow. Having said that since we have closed on the highs of the day and the fact that NQ and YM may try to finish the reversing of the failed 3 day rally, momentum should take markets higher.

Tuesday September 27<sup>th</sup>, 2011 Hi today was a Sell day. Bulls really wanted to show us that the last failed 3 day rally was an error and they gapped up and just kept going most of the day.

Tomorrow will be a SS day. We are way above the 3 day rally averages. We could be continuing the late

day decline

# Wednesday September 28<sup>th</sup>, 2011

Today was a SS day. Markets had rallied to hard in the 2 days that today the wind came out of the sails. Tomorrow will be a Buy day. The decline is already in place however having closed on the lows, momentum may take markets lower before the rally can start. It is also quarter end with some additional manipulation due to portfolio window dressing

Thursday September 29<sup>th</sup>, 2011 Today was a Buy day. It took a while but they finally retested the overnight low and this new test became the buy day low.

Tomorrow will be a Sell day. We could get a confusing day tomorrow since the average rally is already in place.

Today was a Sell day. Markets opened at TTT levels and failed to go higher and therefor had to come down Monday will be a SS day. Having closed below the buy day low, we know we have good odds of getting back above before the close on Monday. A large gap down may put these odds at risk

Monday October 3<sup>rd</sup>, 2011
Today was a SS day. Markets open below the BDL, and they managed to get back to these levels but failed to go higher. The decline then started
Tomorrow will be a Sell day. Momentum may take the markets lower before the rally can start

Thursday October 13<sup>th</sup>, 2011 Today was a Sell day. Some of the markets opened under the BD Low for the day session and therefore had to rally to get back above these lows.

Tomorrow will be a SS day. We closed near these day session BDL and the open in the morning will help decide as the direction the markets should go.

Monday October 17<sup>th</sup>, 2011
Today was a Buy day. As expected momentum did take markets higher but only in the overnight session.
Markets opened with a good GAP down and TVGR took effect all day.
Tomorrow will be a Sell day. Since markets closed on the lows, momentum may take them lower before the

rally can start.

Wednesday October 19<sup>th</sup>, 2011 Today was a SS day. Markets tried to rally but failed to make a higher high and therefore had to start the decline.

Tomorrow will be a Buy day. The decline is already in place however the downward momentum may take

markets lower before the rally starts

Thursday October 20<sup>th</sup>, 2011 Today was a Buy day. As mentioned in last night's report, the downward momentum did take markets lower before the rally started.

Tomorrow will be a Sell day. A good part of the rally is already accomplished and therefore may make a confusing day tomorrow

Today was a Sell day and the rally continued strong

Monday will be a SS day. We have surpassed the Recap levels and are at the Recap MA levels therefore markets could go either way. Having said that momentum should take markets higher before the decline starts

Monday October 31<sup>st</sup>, 2011
Today was a Sell day. Markets barely managed to get a rally in on the 24 hour session and opened below the BDL on the day session. They tried to fight TVGR but the later finally won Tomorrow will be a SS day. We have close way below the BDL and we know we have very good odds to get there, however if we open with another huge gap down these odds could diminish
