Wednesday November 9th, 2011

Today was a SS day. Markets failed to go higher and the decline started opening with a large gap down which triggered TVGR

Tomorrow will be a Buy day. Based on averages the decline is already accomplished, however having closed on the lows, momentum may take the markets lower before the rally can start.

Thursday November 10th, 2011

Today was a Buy day. Markets did make a lower low but only during the overnight session. During the day session markets tested the previous day low which held and the rally started.

Tomorrow will be a Sell day. A good part of the rally is accomplished leaving us with the possibility of a confused Sell day.

Monday November 21st, 2011

Today was a Sell day. Most markets did make it above the BDL however the Day session open with a huge gap down making it impossible to get back to the BDL

Tomorrow will be a SS day. We are still below the BDL and based on Positive 3 day Rally ratio we do have good odds of making it at least to the BDL

Tuesday November 22nd, 2011

Today was a SS day and all markets failed to make it to the BDL once again indicating a possible bigger down trend

Tomorrow will be a Buy day. There is still plenty of room to drop unless the bulls want to undo the Failed 3 day rally.

Friday November 25th, 2011

Today was a SS day. Markets did rally back above the BDL and then the decline started.

Monday will be a Buy day. A good part of the decline is in place, therefore the rally could start at anytime if the bulls want to be in charge

Thursday December 1st, 2011

Today was a Buy Day. The decline was shallow and the retest of yesterday's highs was later rejected and we closed near the lows of the day.

Tomorrow will be a Sell Day. Momentum may take the markets lower before the rally can start.

Thursday December 8th 2011

Today was a SS day. Although I expected a confused day, markets produces a perfect SS day with the failure of the retest of the previous day high, at which time the decline started

Tomorrow will be a Buy day. The decline is in place however momentum may take the markets lower before the rally can start.

Friday December 9th 2011

Today was a Buy day. Momentum did take the markets lower but only in the Globex session and then the rally started

Monday will be a Sell day. Having reached the average rally, this may make for a confused day.

Monday December 12th 2011

Today was a Sell day. Markets tested Friday's highs overnight and failed to go higher and therefore declined to test the Friday lows which held

Tomorrow will be a SS day. Based on today's action it could go either way but should at least open above the BDL or at least rally to the BDL if we open lower.

Tuesday will be a Buy day. Based on averages the decline should continue but let be aware that it will be the day after a holiday

Thursday January 5th2012

Today was a Buy day. Markets produced a nice decline and some even reached TTT levels. The rally then started

Tomorrow will be a Sell day. A good part of the rally is already in place which may make for a confusing day.

Wednesday January 18th 2012

Today was a Buy day. Market declined and failed to go lower than the SS day lows at which point the rally started

Tomorrow will be a Sell day. There is still just a little room to go up on this rally which may create a confused day.

Thursday January 26th 2012

Today was a Buy day. As expected momentum took the markets higher and even opened above yesterday's highs this morning giving us a chance to look for shorts. Great Buy day.

Tomorrow will be a Sell day. The rally should continue.

Monday January 30th2012

Today was a SS day. YM closed below the BDL on Friday and we had good odds of at least getting back to that level. It did during the overnight session but failed to do it during the day session and held the markets from rallying

Tomorrow will be a Buy day. We should be looking forward to a decline.

Monday February 13th 2012

Today was a Buy day. Although I said in error that today was to be a holiday, the markets acted just like it and made a small decline and failed to make one in the day session

Tomorrow will be a Sell day. The rally that started was not a very convincing one and may make for a confusing day.

Wednesday February 15th 2012

Today was a SS day. Markets made new highs and then the decline started. Pretty much text book SS day.

Tomorrow will be Buy day. Most of the decline is in place, therefore the rally could start at anytime

Thursday February 23rd 2012

Today was a SS day. As mentioned in last night's comments, we had very good odds to at least get back to the BDL and we did even make a new high.

Tomorrow will be a Buy day. Based on the close, momentum may take markets higher before the decline starts

Monday February 27th 2012

Today was a Sell day. And a great one at that. We opened below the BDL and we knew we had very high odds of at least getting back to the BDL. Any excuse to long was the way to go until BDL was achieved

Tomorrow will be a SS day. There is still lots of room for the average 3 day rally should they decide to continue the rally

Tuesday March 6th 2012

Today was a Sell day. Markets opened below the Buy day low and had good odds of getting back to the BDL, however TVGR did set in early and forced the markets to ignore TTT

Tomorrow will be a SS day. Again we have large odds of at least getting back to the BDL. Will it happened is the question.

Tomorrow will be a Buy day. having closed on the highs of the day and since ES and YM only missed the previous BDL by few points, we could reach these levels before the decline starts

Thursday March 8th 2012

Today was a Buy day. As mentioned in last night's email we could expect ES and YM to get to the previous BDL that they had just missed. This did happen and prevented from getting the regular decline

Tomorrow will be a Sell day. In principle the rally should continue.

Monday March 12th 2012

Today was a SS day. It was a confused day as the market looked like it started the decline only to reverse and nearly made new highs.

Tomorrow will be a Buy day. Since markets closed on the highs, momentum may take the markets higher before the decline starts.

Tuesday March 13th 2012

Today was a Buy day. The bulls showed us they are in charge by making a small decline in the overnight session but by opening with a good gap up which triggered TVGR

Tomorrow will be a Sell day. Markets are at their average Rally levels which could make for a confused day tomorrow.

Thursday March 22nd 2012

Today was a Sell day. Markets declined hard overnight and opened with a big gap down. TVGR was in effect most of the day, and they failed to get back to the BDL.

Tomorrow will be a SS day. Markets have high odds of at least get back to the BDL.

Friday March 23rd 2012

Today was a SS day. And what a perfect day to show the manipulation. All except YM (missed by 1 point) managed to get to the BDL during the overnight session, then declined and open below the BDL. We knew we had high odds to get back to the BDL during the day session and it took all day buy they made it. Look at ES it did in the last minute of trading

Monday will be a Buy day. Residual momentum may take the markets higher before the decline starts.

Monday March 26th 2012

Today was a Buy day. Markets did get a decline but only in the Globex session. The rally started overnight and with a large gap opening TVGR was then in effect

Tomorrow will be a Sell day. Based on averages, the rally is already accomplished, which may make for a confusing day.

Thursday April 5th 2012

Today was a SS day. Markets tried to get to the BDL twice and failed. Some came close

Tomorrow will be a Buy day. Being a holiday and an unusually shorten day may make for a pretty much untradeable day

Monday April 9th 2012

Today was a Sell day and with all the international markets closed the rally was lite and confused

Tomorrow will be a SS day. There is room to rally if they want too. I guess it will depend how the other markets react to last Friday's decline

Tuesday April 10th 2012

Today was a SS day. Markets decide not to rally and declined all day. We still had positive 3 day rallies

Tomorrow will be a Buy day. Based on averages the decline is accomplished, however, having closed on the lows, momentum may take the markets lower before the rally can start

Monday April 23rd 2012

Today was a SS day. The day session did present a challenge for the markets as they opened below the BDL. They did try hard to get back to these levels, however only YM made it

Tomorrow will be a Buy day. Markets do have room to go lower to reach the averages.

Monday April 30th 2012

Today was a Sell day. Markets were up during the overnight session and some reached TTT levels, after which they declined all day.

Tomorrow will be a SS day. In principle markets should go up, however based on today's performance, as long as we open above the BDL then they could start their decline

Tuesday May 8th 2012

Today was a Sell day. The rally died at the close last night and began a decline that continued all night. The decline even prevented YM to get back to the day session BDL

Tomorrow will be a SS day. There is still some room for the 3 day rally to continue.

Today was a SS day. Markets open with a good gap and most managed to get to or close to their BDL for the day session

Tomorrow will be a Buy day. There is room for the decline to continue and based on the close it should continue lower before a rally can start

Wednesday May 16th 2012

Today was a Sell day. We did go below the BDL to start and then rallied. However the rally fizzled out and the markets closed below the BDL

Tomorrow will be a SS day. Based on averages we do have good odds of at least getting back above the BDL

Thursday May 17th 2012

Today was a SS day. Most markets made it back to the BDL during the overnight session and really came close during the day session. When the day session try failed the decline started

Tomorrow will be a Buy day. Based on averages the decline is in place. However based on the close momentum may take the markets lower before the rally starts.

Tuesday May 29th 2012

Today was a Sell day. It was a confused day with a retest of the BDL and also making new highs by the close

Tomorrow will be a SS day. There is still room for a rally to continue should they want to.

Wednesday May 30th 2012

Today was a SS day. Markets tested the previous day's highs at the open last night and dialed to go higher. The decline then started.

Tomorrow will be a Buy day. Most of the decline is in place. The rally could therefore start at any time. However momentum should take the markets lower before the rally starts
