Thursday May 1st 2014

Today was a SS day. Markets were very confused for a SS day. Maybe because most of Europe was closed today.

Tomorrow will be a Buy day. Some small decline is in place, based on averages the decline should continue.

Monday May 5th 2014

Today was a Sell day. As expected momentum carried the markets lower until they reach Violation levels. From there the rally started. At the open we also know we had extremely high odds of at least getting back above the BDL so this was a great place to long.

Tomorrow will be a SS day. There is still plenty of room for the 3 Day Rally to continue. However being a SS day anything can happen.

Wednesday May 7th 2014

Today was a Buy day. The decline did continue to reach some TTT levels, after which time the rally started.

Tomorrow will be a Sell day. Again most of the rally is in place, however momentum should take markets higher before the confusion starts.

Thursday May 8th 2014

Today was a Sell day. As expected momentum did take the markets higher reaching their Penetration levels. Once there markets reversed and then had a late day small rally.

Tomorrow will be a SS day. markets have a 3 day rally in place and they still have room to go. However the decline could start at any time.

Friday May 9th 2014

Today was a SS day. What a confused SS day. Markets retested the BDL and started to rally again and some reached TTT levels.

Monday will be a Buy day. Momentum may take the markets higher before the decline starts.

Monday May 12th 2014

Today was a Buy day. Markets started their rally in the Globex session and never reversed to create a decline in the Day session. That is very unusual.

Tomorrow will be a Sell day. The rally is in place which may make for a confusing day.

Wednesday May 28th 2014

Today was a Buy day. Some of the markets declined to retest their Previous day Low and failed to go lower. The rally then started.

Tomorrow will be a Sell day. There is plenty of room for the rally to continue.

Friday May 30th 2014

Today was a SS day. Markets were all confused with some continuing the rally and some doing their decline.

Monday will be a Buy day. ES and YM may still have momentum to push them higher before the decline starts.

Monday June 2nd 2014

Today was a Buy day. Markets did have momentum to take them higher, however when the day session started we needed to at least come back down below Friday's high. Markets then retested Friday's lows at which time the rally started.

Tomorrow will be a Sell day. Part of the rally is in place which may make for a confused day.

Tuesday June 3rd 2014

Today was a Sell day. Markets were confused as often happens on Sell days.

Tomorrow will be a SS day. There is plenty of room for the markets to rally if they want to. However the decline could also start at any time.

Thursday June 5th 2014

Today was a Buy day. Markets did get back below yesterday's highs to create a small decline. Then the rally started.

Tomorrow will be a Sell day. Markets have reached or surpassed their average rally levels, which may make for a confusing day.

Wednesday June 11th 2014

Today was a Sell day. Most markets did get back above the BDL after the open this morning. YM failed.

Tomorrow will be a SS day. Markets are currently very close to the BDL and will need to be above at some point during the day session tomorrow. Once that is accomplished markets can take any direction.

Thursday June 12th 2014

Today was a SS day. Due to the Roll Over day it made for a confused SS day. Some didn't get back above the BDL and some did depending what contract you were using.

Tomorrow will be a Buy day. We will be using the new contract for tomorrow. The decline is in place, therefore the rally could start at any time.

Thursday June 19th 2014

Today was a Sell day. As expected markets were confused as they reached TTT levels and pulled back just to rally again.

Tomorrow will be a SS day. Again markets are at their TTT levels which could make for another confused day. Having said that, the decline could start at any time.

Tuesday June 24th 2014

Today was a Sell day. Markets tested their Previous day Low and failed then rallied and failed at the Previous day High, only to drop again and violated the BDL.

Tomorrow will be a SS day. Markets are below the BDL and we know that we have good odds that we will get back above these levels at some point tomorrow.

Monday July 7th 2014

Today was a Sell day. We did have period of the globex session above the BDL but YM and TF failed to get back above during the day session however close they got. This often happened when we have a holiday.

Tomorrow will be a SS day. In principle markets should get back above the BDL before the close tomorrow. Let's be careful in case the holiday effect is not over.

Thursday July 10th 2014

Today was a Sell day. It did live up to its "confused" name. Markets dropped hard overnight and then NQ dragged every one back above the BDL, even if it was for a brief moment.

Tomorrow will be a SS day. Markets are hovering around the BDL and should be above these levels some time during the day session tomorrow.

Tuesday July 15th 2014

Today was a Sell day. Markets had a confused day but did manage to produce some kind of rally.

Tomorrow will be a SS day. TF is the only one below the BDL and should manage to get back above that level before the close tomorrow.

Wednesday July 16th 2014

Today was a SS day. Most markets retested their previous day's high and failed, then retested their lows. TF also managed to get back above the BDL for a brief moment.

Tomorrow will be a Buy day. We should be looking for some decline which is place for all of them except ES.

Tuesday July 29th 2014

Today was a SS day. Markets tested their previous day high and failed to go much higher. They then started their decline.

Tomorrow will be a Buy day. There is still room for the decline to continue and momentum should take care of that.

Thursday July 31st 2014

Today was a Sell day. Markets completely reversed direction to close way below the BDL

Tomorrow will be a SS day. In principle markets should try to get back to the BDL. However if we are in a bearish market, this will not happen.

Wednesday August 6th 2014

Today was a SS day. Most markets opened this morning under the BDL, however was the leader and dragged all of them back over the BDL. That rally soon died and markets started their decline.

Tomorrow will be a Buy day. There is room for the decline to continue.

Thursday August 7th 2014

Today was a Buy day. Markets declined as they should and most reached their TTT levels.

Tomorrow will be a Sell day. A rally started at the end of the day, however it is hard to see if it is the real thing or if we will retest the lows before the real rally starts.

Friday August 15th 2014

Today was a Buy day. Markets opened above yesterday highs and we knew we had good odds that they would at least decline below these levels. Well they did and even reached TTT levels.

Monday will be a Sell day. Based on averages the rally should continue.

Monday August 25th 2014

Today was a Buy day. All markets made a decline during the Globex session but only ES failed to do a decline during the day session probably because it was so close to the 2000 mark

Tomorrow will be a Sell day. There is plenty of room for the rally to go.

Tuesday September 9th 2014

Today was a SS day. Some markets retested their previous day's high and failed. At that point all markets started their decline.

Tomorrow will be a Buy day. A good part of the decline is in place. Therefore the rally could start at any time.

Thursday September 11th 2014

Today was a Sell day. Markets were a bit confused due to the rollover and retested the previous contract day low and then tried to rally.

Tomorrow will be a SS day. There is room for the markets to rally some more before a decline starts.

Wednesday September 17th 2014

Today was a SS day. Markets were a bit confused, probably due to the FOMC meeting

Tomorrow will be a Buy day. There is a decline in place however it feels like the rally started to early. Therefore based on averages we should be looking for a further decline.

Monday September 22nd 2014

Today was a SS day. All markets except TF had a positive 3 day Rally.

Tomorrow will be a Buy day. Most of the decline is in place unless the bears are in charge which is hard to say when only TF failed.

Thursday October 2nd 2014

Today was a Sell day. Markets did go lower on momentum and most surpassed their violation levels, however when TF reached BDL levels it turned around and dragged all the others back above their BDL.

Tomorrow will be a SS day. TF is close to its TTT levels but the others are far below. Though call on this one, but if TF momentum is still in effect we may get higher.

Friday October 3rd 2014

Today was a SS day. Markets rallied past their max levels and then retreated.

Monday will be a Buy day. IF The decline that started today is real then the decline should continue, otherwise the momentum may take the markets higher before the real decline starts

Monday October 6th 2014

Today was a Buy day. Markets tested Friday's highs and even reached the Penetration levels before the decline started.

Tomorrow will be a Sell day. A rally started today but reversed at the end. Therefore that momentum may take markets lower before the real rally starts.

Tuesday October 7th 2014

Today was a Sell day. Markets made it back above the BDL after the overnight lows. Then the decline restarted.

Tomorrow will be a SS day. We do have good odds to get back up above the BDL before the end of the day tomorrow.

Wednesday October 8th 2014

Today was a SS day. If today was not a proof of who manipulates the markets, then we will never know. Even after the further decline below the BDL, markets rallied hard after the FOMC minutes came out and reached the BDL.

Tomorrow will be a Buy day. Momentum may take the markets higher before the decline starts

Monday October 13th 2014

Today was a SS day. TF tried to drag the markets back above the BDL, however when TF got above the decline started.

Tomorrow will be a Buy day. An exaggerated decline is in place which means that the rally could start a any time.

Today was a Buy day. Most markets retested their previous day low, then some kind of rally started.

Tomorrow will be a Sell day. The rally should continue but may be in a confused way.

Wednesday October 15th 2014

Today was a Sell day. After retesting its BDL, TF worked hard to drag the others above their BDL. NQ made it and the others came close.

Tomorrow will be a SS day. Some close below their BDL and we have good odds that they will get back above before the close tomorrow.

Wednesday October 29th 2014

Today was a SS day. The day started well for a SS day but got confused with the FOMC meeting.

Tomorrow will be a Buy day. Markets are not in sync and it is hard to say which way this will go. We do have some kind of decline in place and that too don't help decide on a direction. Based on averages markets should come down some more before the rally starts.
