Today was a Buy day. Markets decline overnight and started to rally shortly before the open.

Tomorrow will be a Sell day. Based on averages the rally should continue, however since half the rally is in place we could be looking to a confused day.

Thursday November 13th 2014

Today was a Sell day. As expected we had a confused day. Markets made new highs and then got confused.

Tomorrow will be a SS day. Based on averages markets should rally some more, however we are above the BDL therefore markets could start declining at anytime.

Monday November 17th 2014

Today was a Buy day. ES and YM made their lows during the overnight session while NQ and TF did it during the day session. Maybe since ES and YM are at record levels it is harder for the others to catch up.

Tomorrow will be a Sell day. Markets have some kind of rally started which could make for a confused day.

Friday November 21st 2014

Today was a Sell day. Markets rallied like crazy overnight just to try to close the gap during the day session. TF and NQ did it as all 4 were under TVGR effect all day.

Monday will be a SS day. We closed at TTT levels for Monday and therefore the decline could start at any time.

Today was a SS day. Markets were confused and tried to get to Friday's highs but with no conviction.

Tomorrow will be a Buy day. We should be looking forward to a decline, however momentum may take markets higher before the decline starts.

Today was a Sell day. Markets did produce a little rally during the 24 Hour session, however 2 of them failed during the day session. This could be related to the holiday.

Tomorrow will be a SS day. All markets are below the BDL and should attempt to rally at least above the BDL.

Tuesday December 9th 2014

Today was a Sell day. What a day it was. If you asked anyone at the open which way we were going to go, they would have answered down. But TTT came to the rescue. It took all day but even YM made it to the BDL just before the close. In my case my system gave me a trade on TF early in the day and was able to ride it to the BDL.

Tomorrow will be a SS day. Except for YM all markets closed above the BDL. I would therefore expect at least a small rally until all markets are above during the day session, after that all bets are off for the longs.

Wednesday December 10th 2014

Today was a SS day. All markets stayed above the BDL for the 24 Hour session and only YM missed the goal for the day session.

Tomorrow will be a Buy day. All markets are below the average TTT levels for a Buy day. Therefore markets could start a rally at any time, however based on the last 2 day's performance, momentum may take markets lower before the rally starts.

PS: the levels for tomorrow are based and should be used on the Dec contract and we will start using the March contract on Friday.

Thursday December 11th 2014

Today was a Buy day. Markets made a low overnight and then rallied, however the decline restarted and we closed near the lows. Looks like a typical rollover day.

Tomorrow will be a Sell day. Having closed on the lows of the day, momentum may take markets lower before the rally starts.

Friday December 19th 2014

Today was a Buy Day. It was a confused Buy day and the decline was small. However based on the large rally yesterday that was to be expected.

Monday will be a Sell day. Half the rally is in place, which may make for another confused sell day.

Tuesday December 30th 2014

Today was a Buy day. ES retested its previous day high during the overnight session and failed. The decline started.

Tomorrow will be a Sell day. We should be looking forward to a rally, however being the last day of the year and the need for some window dressing, that rally may be confused.

Thursday January 8th 2015

Today was a Buy day. Markets produced a very small decline overnight, however the rally started early and the gap was too large for the day session to recover once TVGR set in.

Tomorrow will be a Sell day. Markets close above their TTT levels for tomorrow which may make for a confused day.

Wednesday January 14th 2015

Today was a Sell day. Markets dropped overnight and were below the BDL at the open. They all rallied to the BDL and when YM failed to continue passed the BDL the decline restarted and later the rally restarted again. I think that qualifies for a confused day.

Tomorrow will be a SS day. YM is still below the BDL and therefore needs to get back above before an official decline can starts.

Wednesday January 28th 2015

Today was a SS day. Markets made it above the BDL during the overnight session, however YM and NQ failed during the day session, at which point the rest followed for the way down.

Tomorrow will be a Buy day. Markets are way past their TTT levels, having said that momentum may take markets lower before a rally can start.

Friday January 30th 2015

Today was a Sell day. Markets were confused by the oversized rally from yesterday and most markets tried to retest their BDL.

Monday will be a SS day. TF closed below its BDL and should at least get back above before the close of the day. Once above all markets could go any which way.

Monday February 2nd 2015

Today was a SS day. Markets were very confused, however when some opened below the BDL they rallied above and the got confused by going lower ad then rallying.

Tomorrow will be a Buy day. We should be looking forward to a decline. However having closed on the highs of the day, momentum may take markets higher before the decline starts.

Tuesday February 3rd 2015

Today was a Buy day. Momentum was stronger than TTT for the day session, and TVGR did set in preventing the decline.

Tomorrow will be a Sell day. Markets closed at or above TTT which could make for a confusing day.

Thursday February 5th 2015

Today was a SS day. Markets continued their rally and all reached TTT penetration levels before stalling.

Tomorrow will be a Buy day. We should be looking for a decline. However having closed near the highs, momentum may take markets higher before the decline starts.

Tuesday February 17th 2015

Today was a Sell day. Markets retested the BDL and then the rally started only to close at or close to the Previous Day's highs.

Tomorrow will be a SS day. There is plenty of room for the rally to continue, however the decline could start at any time

Wednesday February 18th 2015

Today was a SS day. Markets were relatively quiet and some closed at the highs for the day.

Tomorrow will be a Buy day. We should be looking for a decline, however I wonder if the ones that closed at their highs will have momentum to drag the others higher before the decline starts.

Wednesday February 25th 2015

Today was a Sell day. Markets retested their previous day's high and then the confusion started.

Tomorrow will be a SS day. There is room for the rally to continue, however the confusion could still be there.

Monday March 2nd 2015

Today was a Sell day. Markets retested their BDL and the rally then started.

Tomorrow will be a SS day. There is room for the rally to continue, and momentum should help that, before the decline starts.

Friday March 6th 2015

Today was a SS day. Well there was no confusion. Markets retested yesterday's highs and failed, then the decline started.

Monday will be a Buy day. We are below the average decline therefore the rally could start at any time, however momentum may take markets lower before the rally starts.

Tuesday March 10th 2015

Today was a Sell day. Markets weren't confused at all. The decline started overnight and shortly after the open TVGR set it and therefore the decline continued all day.

Tomorrow will be a SS day. At this point all markets are below the BDL. We do have good odds that we should get above these levels, however it is a long ways away. So we need to be careful on that.

Wednesday March 11th 2015

Today was a SS day. TF was the only one to make it back to the BDL and closed on its high compare to the other 3 that closed on their lows.

Tomorrow will be a Buy day. Whit the major 3 closing on their lows, momentum may take markets lower before the rally starts.

Thursday March 12th 2015

Today was a Buy day. Markets did decline some during the OverNight session, then the rally started. NQ was the lager with TF being the leader.

Tomorrow will be a Sell day. Markets are at or have surpassed their TTT levels, again with NQ being the lager. We could be looking for a confused day.

Today was a SS day. Markets were still confused with the FOMC decision with YM and ES going one way and NQ TF all different.

Tomorrow will be a Buy day. It is confusing to say what will happen as it is different for each instrument. Let your experience in that instrument guide you .

Friday March 20th 2015

Today was a Buy day. Markets did produce some decline burring the overnight session, and then started rallying, creating a failed day session decline due to TVGR.

Monday will be a Sell day. Most of the rally is in place which could make for a confused day.

Thursday March 26th 2015

Today was a Sell day. Momentum did take markets further and finally rallied back to the BDL. Only to close lower.

Tomorrow will be a SS day. We do have good odds to at least get back above the BDL before the decline starts.

Monday March 30th 2015

Today was a Buy day. The bulls took charge of the markets and ran all night up and created a large gap at the open. TVGR took over and the markets kept going up all day.

Tomorrow will be a Sell day. Most markets are close to their TTT levels and therefore we could be in for a confused day.

Friday April 3rd 2015

Today was a Sell day. Markets closed even earlier than usual. The news and the thin markets made the markets close below the BDL.

Monday will be a SS day. We do have good odds of getting back above the BDL, however momentum may take the markets lower before a rally starts. We may also get problems with TVGR.

Monday April 6th 2015

Today was a SS day. We did get a good rally that took markets at or above their TTT levels.

Tomorrow will be a Buy day. Now that all world markets will be open I am curious if momentum will take markets higher before the decline starts.

Wednesday April 15th 2015

Today was a Buy day. Momentum took markets higher and only ES didn't produce a decline for the day session. The others made at least a small decline.

Tomorrow will be a Sell day. There is some small room for the rally to continue, however it may be in a confused way.

Thursday April 16th 2015

Today was a Sell day. As expected it was a confused day, going nowhere fast.

Tomorrow will be a SS day. Again there is room for the rally to continue, however the decline could start at any time.

Tuesday April 21st 2015

Today was a Sell day. Markets rallied and reached their TTT levels and even reached their Penetrations levels.

Tomorrow will be a SS day. Now we are below TTT 3 day levels. We should rally back to these levels. However the decline could start at any time.

Thursday May 7th 2015

Today was a Sell day. Markets retested their BDL and failed to go much lower. Then the real rally started and most reached their TTT levels for the day.

Tomorrow will be a SS day. We are very close to TT levels, therefore the decline could start at any time.

Tuesday May 12th 2015

Today was a Sell day. As expected momentum did take the markets lower before the rally started. They all made it above the BDL although it looked impossible.

Tomorrow will be a SS day. Some markets did close below the BDL and should rally at least back above these levels before the decline starts.

Wednesday May 20th 2015

Today was a Sell day. As expected markets were confused, retesting the BDL and Previous Day High and back to BDL.

Tomorrow will be a SS day. I would expect another confused day that should have at least part of the day session above the BDL.

Friday May 22nd 2015

Today was a Buy day. Markets were quiet and boring really but we did get a small decline.

Monday will be a Sell day. Markets did close close to their lows of the day, therefore whatever momentum there was could take markets lower before the rally starts.

Monday May 25th 2015

Today was a Sell day. Markets played with the BDL and ES closed under but close to the BDL.

Tomorrow will be a SS day. There is plenty of room to rally, however once ES gets above the BDL then all bets are off.

Today was a Buy day. As mentioned last night, the decline was in. Today the markets played around TTT levels for a while and then the rally started.

Tomorrow will be a Sell day. Again today most of the work is done. The rally don't have much to go, and therefore we could be in for a confused day.

Tuesday June 2nd 2015

Today was a Sell day. Markets retested their BDL and then rallied again, with some reaching their TTT levels.

Tomorrow will be a SS day. Plenty of room to rally if they want. However we need to be careful on longs on a SS day.

Friday June 5th 2015

Today was a Sell day. Markets were confused and declined further to reach their Violation levels, at which point some king of a confused rally started.

Monday will be a SS day. Markets should at least get above their BDL. After that markets could go either way.

Wednesday June 24th 2015

Today was a SS day. Some retested their previous day high's and failed to go higher. That started the decline for all of them.

Tomorrow will be a Buy day. Most of the decline is in place, therefore the rally could start at any time.

Thursday June 25th 2015

Today was a Buy day. Markets did attempt a rally and failed. The decline amplified and surpassed TTT levels.

Tomorrow will be a Sell day. Markets are at or close to the BDL. Therefore Momentum may take markets lower before the real rally starts.

Friday June 26th 2015

Today was a Sell day. Markets failed to rally and hovered around the BDL most of the day.

Monday will be a SS day. So far only NQ close below the BDL and should be able to rally back to that level at some point on Monday based on averages.
