Wednesday July 1st 2015

Today was a Sell day. Markets rallied all night and reached their Penetration levels. At that point they got confused and decline and re-rallied.

Tomorrow will be a SS day. Markets are at TTT which could make for another confused day, or the decline could start at any time.

Friday July 3rd 2015

Today was a Buy day. Markets were slow due to the holiday. Small decline and some kind of rally.

Monday will be a Sell day. In principle the rally should continue, however we sometimes have larger confusion after a holiday.

Monday July 6th 2015

Today was a Sell day. As expected due to the holiday we could expect a very confused day. The Greek vote didn't help and we opened way below the BDL. Based on odds Markets had to rally and get back to the BDL and they did.

Tomorrow will be a SS day. Markets close ay their BDL. Again if we open below the BDL, we have good odds to get at least back above these levels.

Tuesday July 7th 2015

Today was a SS day. Markets were confused and even if we opened above the BDL, we got a decline and a rally.

Tomorrow will be a Buy day. Having closed near the highs of the day, momentum may take markets higher before the decline starts.

Monday July 13th 2015

Today was a Buy day. On the 24hr markets we did get a decline, markets then filled the gap and continued rallying. At the day session opening we now had a gap up, but this time TVGR did set in and the rally just continued.

Tomorrow will be a Sell day. Markets closed way above the average rally. That could create some confusion for tomorrow's trading.

Thursday July 16th 2015

Today was a Buy day. All markets di produce some decline in the overnight session. However only 2 out of 4 produced a decline in the day session.

Tomorrow will be a SS day. There is room for the rally to continue, however it could be confused based on today's action.

Friday July 17th 2015

Today was a Sell day. Some markets did go under the BDL and only TF closed below but by only 1 tick

Monday will be a SS day. All except TF closed above the BDL and even TF closed 1 tick below. Half the rally is in place so we could be looking for some confusion.

Tuesday July 28th 2015

Today was a SS day. Some of the markets opened below the BDL. The others had to pull them up and finally they all finished above.

Tomorrow will be a Buy day. Having closed near the highs of the day, momentum may take markets higher before the decline starts.

Thursday July 30th 2015

Today was a Sell day. Most markets retested their BDL and failed to go lower, the rally then started and reached TTT levels.

Tomorrow will be a SS day. Most of the 3 day rally is in place, therefore the decline could start at any time.

Wednesday August 12th 2015

Today was a Sell day. Markets opened below the BDL this morning. We knew that we had good odds of at least getting back above and we did.

Tomorrow will be a SS day. Again we will have the same dilemma should we open below the BDL tomorrow AM.

Thursday August 20th 2015

Today was a Sell day. Markets failed at the BDL and the decline continued.

Tomorrow will be a SS day. We are far from the BDL but averages are calling for at least a good try to get there.

Friday August 21st 2015

Today was a SS day. Markets declined further overnight and tried to rally but got rejected at yesterday's lows. Having failed to fill the gap TVGR took over and they declined for the rest of the day.

Monday will be a Buy day. Markets are way below the average decline. However having closed near the lows of the day, momentum may take markets lower before a rally starts.

Monday August 24th 2015

Today was a Buy day. What a decline that was, reminds me of the 2007-2008 era.

Tomorrow will be a Sell day. A rally is already in place. We could be looking for a confused day.

Today was a Sell day. Markets retested yesterday's highs and failed, a pullback ensued.

Tomorrow will be a SS day. There is room for the decline to continue. More confusion???

Friday August 28th 2015

Today was a Sell day. Market tried to penetrate the previous day high and failed multiple times, therefore giving us a confused day.

Monday will be a SS day. Again we are way above the average 3 Day Rally. Therefore the decline could start at any time, however having closed on the highs of the day, momentum may take markets higher before the decline starts.

Today was a SS day. Markets were confused and finally decided to start the decline,

Tomorrow will be a Buy day. Some of the markets are at TTT levels and some need to go lower. Therefore we may get more confusion or decline before the rally starts.

Wednesday September 9th 2015

Today was a Buy day. Momentum did take the markets higher before the decline started. At the open markets were above yesterday's highs, at that point we knew we had very good odds that the decline would be starting soon and they declined all the way to TTT levels.

Tomorrow will be a Sell day. Some of the rally seems to have started and should continue tomorrow.

Thursday September 10th 2015

Today was a Sell day. Markets opened below the BDL and we knew we had good odds of at least getting back above the BDL. After that the markets were confused.

Tomorrow will be a SS day. As long as we open or get above the BDL, the rest of the day is up for grabs.

Friday September 11th 2015

Today was a SS day. Markets did open below the BDL for the day session, then rallied back above as per TTT.

Monday will be a Buy day. We should be looking forward to a decline. However having closed near close to the High of the day session, momentum may take markets higher before the decline starts.

Tomorrow will be a Buy day. There is plenty of room for the decline to go. It may have to deal with some of the markets that failed to get above the BDL, which often happens when we get failure to get back above their BDL

Today was a Buy day. Markets declined hard and got lower than some of their violation levels.

Tomorrow will be a Sell day. A rally did start today and is half way to their TTT levels. That could make for a confused day.

Friday September 25th 2015

Today was a Buy day. It was a bit confused as a decline reached TTT levels overnight and then rallied just to decline again during the day session and again reaching their TTT levels.

Monday will be a Sell day. Part of the rally is in place, which could make for a confused day.

Monday September 28th 2015

Today was a Sell day. Markets managed to be above the BDL during the day session. Then a further decline started.

Tomorrow will be a SS day. Markets closed below their BDL. Based on averages we have good odds of getting back above the BDL before the close tomorrow. Having said that markets are far from that goal, which may get us a failed 3 day rally. Let's be careful.

Tuesday September 29th 2015

Today was a SS day. As I suspected we were to far to get back to the BDL and therefore got a failed 3 day rally. In itself that is bearish unless they recover that gap tomorrow.

Tomorrow will be a Buy day. There is room for the decline to continue before the rally starts.

Wednesday September 30th 2015

Today was a Buy day. Markets rallied from the starts and even got a gap at the open. Some rallied abobe the previous BDL negating the 3 day failure.

Tomorrow will be a Sell day. Markets closed at or above their TTT levels for a Sell day, therefore we should expect a confused day.

Friday October 2nd 2015

Today was a SS day. Markets retested their Previous Day Low's and started to rally again. They then reached their Penetration levels.

Monday will be a Buy day. Having close near their high's, momentum may take markets higher before the decline starts.

Monday October 5th 2015

Today was a Buy day. The decline was only in the overnight session and very small, therefore confirming the negation of the last 3 day rally failure.

Tomorrow will be a Sell day. Markets are way above their targets for a Sell day rally and therefore could make for a confused day.

Today was a SS day. Markets continued their rally to at least reach their Penetration levels.

Tomorrow will be a Buy day. Some of the markets have started their decline, however since some closed near their highs of the day, momentum may take markets higher before the decline starts.

Today was a Buy day. Momentum did make markets retest their Previous day High's, then the decline started. Some reached their TTT levels.

Tomorrow will be a Sell day. Having closed on the lows of the day, momentum may take markets lower before the rally starts.

Today was a Buy day. As mentioned last night momentum did take markets higher before a decline started. It only produced a small decline before the rally started.

Monday will be a Sell day. Half the rally is in place, which may make for a confused day.

Tuesday October 27th 2015

Today was a Sell day. Except for TF and NQ the other markets were fighting with the BDL back and forth. NQ pulled markets up while TF tried to pull them down.

Tomorrow will be a SS day. Markets should at least get above their BDL at some point.

Monday November 9th 2015

Today was a Sell day. Markets failed to rally further and declined below the BDL. However they rallied back and closed near the BDL.

Tomorrow will be a SS day. Markets should at least get back above the BDL. After that all bets are off and they could go either way.

Tuesday November 10th 2015

Today was a SS day. Markets all made it back above the BDL on the overnight session but Even if TF tried to drag every one above during the day session, NQ failed by a bit.

Tomorrow will be a Buy day. Having closed near the highs of the day, momentum may take markets higher before the decline starts.

Friday November 13th 2015

Today was a SS day. Markets failed to get back above the BDL which is bearish. If we get another BDL break in the next cycle then we need to worry about a real change in trend.

Monday will be a Buy day. The decline is more than usual already therefore the rally could start at any time. Having said that if we get a further big decline this may also confirm a change of trend.

Monday December 14th 2015

Today was a SS day. We had a failed 3 day rally which is bearish. However markets did reach their Violation levels and tried to rally.

Tomorrow will be a Buy day. If the markets continue their rally to try to reverse this failure it would negate the bearish 3 day rally.

Tuesday December 29th 2015

Today was a Buy day. Markets did produce a small decline overnight, but the rally started early. TVGR was in effect all the way through the day session and the rally continued.

Tomorrow will be a Sell day. Markets have reached their average TTT levels for a Sell day. Momentum may take markets higher but we may be in for a confused day.

Wednesday December 30th 2015

Today was a Sell day. Markets retested their Buy day highs during the overnight session and failed. A decline therefore started, with some markets closing below their Day session BDL.

Tomorrow will be a SS day. Based on averages, markets should at least get back above their day BDL. After that it could go either way.

Today was a SS day. Markets produced a positive 3 day rally for the 24 hr session, however they tried to rally hard to get positive for the day session but failed. Then the real decline started.

Monday will be a Buy day. Most of the decline is in place however momentum may take markets lower before the real rally starts.
