Wednesday January 6th 2016

Today was a SS day. Markets opened the Day session below the BDL. Therefore it had to rally and it did get above the BDL, then the markets got confused by declining below and back above the BDL.

Tomorrow will be a Buy day. Markets are at or below their TTT levels for tomorrow. Therefore the rally could start at any time.

Tuesday January 26th 2016

Today was a Sell day. As expected momentum did take markets lower during the overnight session and reversed on their Violation levels, then the rally even reached Penetration levels.

Tomorrow will be a SS day. Markets closed at or close to TTT levels. Therefore the decline could start at any time.

Wednesday January 27th 2016

Today was a SS day. Different markets did different things. Some tested their Penetration levels, and some their previous day high's. Then a decline started.

Tomorrow will be a Buy day. Most of the decline is in place, which could make for a confusing day.

Thursday January 28th 2016

Today was a Buy day. Markets retested yesterday's lows and then some kind of rally started.

Tomorrow will be a Sell day. A good part of the rally is in place, which could make for a confused day.

Wednesday February 3rd 2016

Today was a Sell day. What a confused day we had. Some markets went to their Violation levels before rallying again and some getting to their TTT levels.

Tomorrow will be a SS day. NQ close at its BDL level with the others closing half way to their TTT levels. Looks like another confused day ahead.

Thursday February 4th 2016

Today was a SS day. NQ managed to confuse the markets as it was above, below and above again its BDL. The others reached their Penetration levels and then a decline started.

Tomorrow will be a Buy day. A good part of the decline is in place, therefore the decline could start at anytime.

Monday February 8th 2016

Today was a Sell day. Markets did produce some kind of rally during the overnight session. However declined further in that same overnight session and the day session opened way below the BDL. Markets did try to rally back to these levels, but the mountain was too high to climb.

Tomorrow will be a SS day. The climb may not be over yet and we do have good odds of getting there tomorrow.

Tuesday February 9th 2016

Today was a SS day. Some of the markets made it back to the BDL, that was a great effort considering the drop.

Tomorrow will be a Buy day. After the kind of cycle we just had we could be in for a confused day. Maybe rallying to the old BDL for the ones that missed and then the decline could start.

Wednesday February 10th 2016

Today was a Buy day. As expected markets did go higher to reach their previous BDL and then the decline started.

Tomorrow will be a Sell day. The rally seem to have started and should continue. Maybe it will be in a confused manner.

Thursday February 11th 2016

Today was a Sell day. NQ and TF worked hard to drag the other 2 back above the BDL but they failed for the day session. All this was done in a very confused manner.

Tomorrow will be a SS day. Some are still below the BDL and they probably will continue their effort to get there.

Today was a SS day. TTT made the day again by getting all markets above the BDL for both sessions and reaching their Penetration levels.

Monday will be a Buy day. Having closed on the highs of the day, momentum may take markets higher before the decline starts.

Monday February 15th 2016

Today was a Buy day. Markets failed on the 24 hour session for the 2nd time in 8 years. The holiday probably had something to do with it.

Tomorrow will be a Sell day. A good part of the session is in place which may make for a confused day.

Wednesday March 2nd 2016

Today was a Buy day. Momentum did take markets higher before the decline started which was smaller than average.

Tomorrow will be a Sell day. The rally that started today has accomplished a good part of the expected move. We could therefore be in for a confused day.

Thursday April 7th 2016

Today was a Sell day. As expected markets were confused. They first tested their previous day highs, then declined and retested their previous day lows..

Tomorrow will be a SS day. As long as we open above the BDL then any direction is good. Another confusing day ahead.

Tuesday April 12th 2016

Today was a Sell day. It was a perfect text book Sell day. Violated overnight and rallied, just to retest the BDL and then finally rally for the rest of the day.

Tomorrow will be a SS day. Having closed on the highs of the day, momentum may take markets higher before the decline starts.

Thursday April 14th 2016

Today was a Buy day. Markets did produce a decline however it was a shallow one. Most likely due to the strength of the previous cycle.

Tomorrow will be a Sell day. We could be looking at more confusion or a good rally day.

Friday April 15th 2016

Today was a Sell day. As expected markets were confused. Some retested their BDL and some just drifted around

Monday will be a SS day. We may finally get the rally we were supposed to get, however the decline could start at anytime.

Monday April 18th 2016

Today was a SS day. Markets opened last night below their respective BDL. We knew we had very high odds of at least getting back above these levels before the end of the session. Markets rallied and even reached their Penetration levels.

Tomorrow will be a Buy day. Having closed near the highs of the session, momentum may take markets higher before the decline starts.

Tuesday April 19th 2016

Today was a Buy day. Markets opened above the SS day high's, and we knew we had very high odds of getting back below these highs. Some even gaped up during the day session and again we knew we had great odds of at least getting back under the previous day's highs. And we did.

Tomorrow will be a Sell day. Part of the rally is in place which could make for a confused day. However the bias is to the up side.

Wednesday April 20th 2016

Today was a Sell day. Markets rallied and some reached their TTT levels before reversing. The others has at least surpassed their previous day highs.

Tomorrow will be a SS day. Based on averages there is room for the rally to continue, however it is a SS day, therefore longs should be taken with care.

Thursday April 21st 2016

Today was a SS day. Markets tested their Previous day Highs during the overnight session and failed. The decline then started.

Tomorrow will be a Buy day. Having closed on the lows, and being so close to the target TTT lows, we have a dilemma. Momentum could take the markets much lower, or the rally could start at any time.

Friday April 22nd 2016

Today was a Buy day. Markets retested their Previous Low which failed and most markets reached their Violation levels before rallying.

Monday will be a Sell day. The rally is half way done on most, therefore we could be in for a confused day.

Monday April 25th 2016

Today was a Sell day. ES and YM both performed the same way by penetrating the highs at the Globex open and then testing their BDL during the overnight session and violating it during the day session only to rally again. TF and NQ were not so extreme but did have a confusing day.

Tomorrow will be a SS day. There is plenty of room for the rally to continue, however being a SS day, it could go either way.

Tuesday April 26th 2016

Today was a SS day. Every instrument had their own agenda and talk about confusion. TF rallied like crazy while ES and YM rejected the previous day's highs. YM NQ closed way low.

Tomorrow will be a Buy day. Based on TF and ES closing on or close to their highs, Momentum may take markets higher before the decline starts. Having said that maybe the power of NQ and TF will negate the momentum.

Wednesday April 27th 2016

Today was a Buy day. Markets tried to retest the Previous day lows. NQ violated it and the others either didn't get there or bounced off of it.

Tomorrow will be a Sell day. There is room for the rally to continue and momentum should help getting markets to their TTT levels.

Thursday April 28th 2016

Today was a Sell day. As usual it was a confusing day. Markets tested their Previous day highs and Lows during the overnight session, but then again retest of highs just to get to the lows and even lower. ES bounced on the Violation levels and closed close to the BDL.

Tomorrow will be a SS day. We know we have high odds of at least getting back to the BDL, however once done it could go either way.

Friday April 29th 2016

Today was a SS day. We had great odds and failed to get back above the BDL. This is usually a bearish sign unless we reverse this trend in the next cycle.

Monday will be a Buy day. During today's session we surpassed the average future BDL goal and bounced back. This makes it very confusing for Monday. We need to see where we open before we can forecast the direction. The rally could continue and negate the 3 day cycle failure or the decline could continue.

Monday May 2nd 2016

Today was a Buy day. Markets rallied hard and some reached their Previous BDL. Therefore negating the failure we had on Friday.

Tomorrow will be a Sell day. Most of the rally is in place which could make for a confused day.

Tuesday May 3rd 2016

Today was a Sell day. Markets were confused and retested their BDL many times and closed very close to it.

Tomorrow will be a SS day. As far as the Globex session we will probably be good with a 3 day rally. Markets will have to hold overnight and/or rally tomorrow to keep the day session in the plus.

Wednesday May 4th 2016

Today was a SS day. Markets managed to get a positive 3 day rally, however it was only in the Globex session. What this means is that it is not really a full bear market reversal. Last failure was nearly negated and this one is not perfect. The bears are trying but so far not in full control.

Tomorrow will be a Buy day. Based on averages we should be looking forward to a further decline.

Thursday May 5th 2016

Today was a Buy day. Again markets did manage to get back above the previous BDL before the decline started. The decline reached TTT levels before reversing.

Tomorrow will be a Sell day. There is plenty of room for the rally to continue.

Friday May 6th 2016

Today was a Sell day. Markets opened below the BDL in the day session and we knew we has very very high odds of at least getting back above the BDL. This low was retested many times and we closed above.

Monday will be a SS day. Having closed on the highs of the day, momentum may take markets higher before the decline starts.

Tuesday May 10th 2016

Today was a Buy day. We did get a decline in all markets except in ES day session which was just a few points away.

Tomorrow will be a Sell day. Most of the markets rally is in place except ES which is trailing behind. Therefore we could be looking at two scenarios. 1st the rally continues due to ES needing to go higher or 2nd the markets will be confused.

Wednesday May 11th 2016

Today was a Sell day. Markets had reached their average rally for a Sell day and retested their previous day highs and failed. They then reversed and closed near their low for the day.

Tomorrow will be a SS day. Momentum may take markets lower at first. However we should be looking to get back above the Day Session BDL before the end of the day tomorrow.

Thursday May 12th 2016

Today was a SS day. All markets had their own agenda. This ended up confusing. But based on ES which retested its PH "Previous High" then the decline started and bounced off the BDL, it also was confusing.

Tommorow will be a Buy day. A good part of the decline is in place, which means that the rally could start at any time.

Thursday May 19th 2016

Today was a Sell day. Markets were confused and although they started half way through the rally they went to violate the BDL and then rallied again.

Tomorrow will be a SS day. There is room for the 3 day rally to continue, however the decline could start at any time.

Tuesday May 24th 2016

Today was a Sell day. As expected momentum did retest the BDL during the Globex session but failed. The rally then started and never looked back surpassing all TTT levels.

Tomorrow will be a SS day. We are above 3 day rally targets, however momentum may take markets higher before the real decline starts.

Friday June 3rd 2016

Today was a Buy day. Markets tested their previous day high's and failed to go much higher. The decline then started and reached TTT levels. At that point the rally started. Great TTT day .

Monday will be a Sell day. A good part of the rally is in place which could make for a confusing day.

Tuesday June 7th 2016

Today was a SS day. Markets continued their rally and once they came close to their Penetration levels, the decline started.

Tomorrow will be a Buy day. There is still room for the decline to continue should the big boys want to do that.

Thursday June 9th 2016

Today was a Sell day. Being rollover day on a Sell day or SS day is just not very representative for the 3 day cycle. The cycle may be off completely.

Tomorrow will be a SS day. Markets are below the OLD contract BDL but too far and therefore should be able to get back above that level.

Friday June 10th 2016

Today was a SS day. Markets failed to get a positive 3 day rally, in principle this is a bearish sign unless negated on early next week.

Monday will be a Buy day. There is room for the decline to continue unless they want to negated this failed rally.

Tuesday June 14th 2016

Today was a Sell day. Momentum did take markets lower and the reached their Max Violation levels. Then a rally started and some made it back again to the BDL

Tomorrow will be a SS day. Most are at their BDL except NQ. We have good odds of them all getting above their BDL during the day session, and the catalyst may be the FOMC meeting.

Tuesday June 21st 2016

Today was a Buy day. Markets did produce a decline and some reached their TTT levels before the rally started.

Tomorrow will be a Sell day. There is plenty of room for the rally to continue but it may be in a confused way.

Wednesday June 22nd 2016

Today was a Sell day. Some markets retested their Previous Day High and some reached TTT levels, before a decline started. Probably Brexit effect to the cycle.

Tomorrow will be a SS day. Markets should get or stay above their BDL. Brexit should make it confusing.

Friday June 24th 2016

Today was a Buy day. This decline should probably get in the record books. Then some kind of bounce/rally started.

Monday will be a Sell day. After a day like this I can't even think of a TTT comment.

Monday June 27th 2016

Today was a Sell day. Markets did make some kind of rally during the Globex session but failed during the day session. It is strange since the European markets even closed above their BDL.

Tomorrow will be a SS day. Based on averages, markets should at least get back above their BDL.

Wednesday June 29th 2016

Today was a Buy day. Markets did produce a small decline for the Globex session but failed to produce a decline for the day session. That is somewhat bullish but could be a reaction to the large decline of last cycle.

Tomorrow will be a Sell day. Markets have already surpassed their TTT rally levels. Having closed on the highs of the day, momentum may take markets higher. We could also be in for a confused day.
