Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to with stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Monday July 3<sup>rd</sup> 2017

Today was a Buy day. We were looking for a decline and ES, YM and TF reached or surpassed their Violation levels before the decline started. NQ reversed at its PH level.

Tomorrow will be a Sell day. Markets will be open only till 1PM EST. We should be looking for some kind of rally

Enjoy your 4<sup>th</sup> of July

Thursday July 6<sup>th</sup> 2017

Today was a SS day. Markets tried to rally but some failed to get back to their BDL during the day session.

Tomorrow will be a Buy day. Markets are at or below their projected levels, therefore the rally could start at anytime.

Monday July 10<sup>th</sup> 2017

Today was a Sell day. Markets rallied in a confused manner, maybe it was caused by TF switching exchange.

Tomorrow will be a SS day. There is room for the rally to continue but we could be in for some more confusion

I am still using the TF instrument for now until volume switches over.

Tuesday July 11<sup>th</sup> 2017

Today was a SS day. Markets were really confused, retesting their BDL and rallying again. Maybe the TF switch is creating some manipulating.

Tomorrow will be a Buy day. Momentum may take markets higher before the decline starts.

Wednesday July 12<sup>th</sup> 2017

Today was a Buy day. Markets did produce a small decline in the overnight session, but failed to do so in the day session.

Tomorrow will be a Sell day. I would be looking for a confused day in order to compensate for today's failure.

Tuesday July 18<sup>th</sup> 2017

Today was a Sell day. Markets were confused and only YM failed to make a positive rally during the day session.

Tomorrow will be a SS day. Since YM still need to get above its BDL I believe that the rally should continue

Today was a Buy day. Momentum did take markets higher before a smaller than expected decline took place.

Tomorrow will be a Sell day. We could be in for a confused day tomorrow as it is summer Friday and not much really happened today.

Monday will be a SS day. Markets should get back above their BDL. Once accomplished, all bets are off and the decline could start.

Monday July 24<sup>th</sup> 2017

Today was a SS day. Markets rallied as hard as they could but once YM was above the BDL and TF was 3 ticks away, The decline started.

Tomorrow will be a Buy day. There is room for the decline to continue but we may be looking at a confused day.

Tuesday July 25<sup>th</sup> 2017

Today was a Buy day. It was a confused day with all markets making a small decline on the 24 hours session but 2 failed to do it in the day session.

Tomorrow will be a Sell day. There is room for the rally to continue but I would be looking for confusion.

Wednesday July 26<sup>th</sup> 2017

Today was a Sell day. Markets were confused as all 4 couldn't go in the same direction all day.

Tomorrow will be a SS day. Markets are all above their BDL with room to continue their rally. Having said that the decline could start at any time.

Wednesday August 2<sup>nd</sup> 2017

Today was a Buy day. Momentum did take the markets higher then the decline started. After failing to breach yesterday's low, the rally started.

Tomorrow will be a Sell day. There is room for the rally to continue, however it may be in a confused way.

Thursday August 3<sup>rd</sup> 2017

Today was a Sell day. Markets were confused and probably TF had something to do with it as it closed below it's BDL

Tomorrow will be a SS day. TF needs to get back above its BDL then all bets are off .

Friday August 4<sup>th</sup> 2017

Today was a SS day. Once TF rejected its BDL then some kind of rally started; mostly confused.

Monday will be a Buy day. There is room for the decline to continue.

Monday August 7<sup>th</sup> 2017

Today was a Buy day. The decline was smaller than average.

Tomorrow will be a Sell day. There is plenty of room for the rally to continue, however I wouldn't be surprised if we retested today's low.

Tuesday August 8<sup>th</sup> 2017

Today was a Sell day. Markets rallied and hit their Targeted 3 day rally and then declined again to retest their BDL.

Tomorrow will be a SS day. Based on averages markets should rally again. However once they are above their BDL during the day session, all bets are off.

Tuesday August 15<sup>th</sup> 2017

Today was a Buy day. As expected markets went higher before the decline started. Also the decline found resistance at the Range level.

Tomorrow will be a Sell day. There is room for the rally to continue, however it may in a confused way.

Friday August 18<sup>th</sup> 2017

Today was a Buy day. Markets tested their previous day low, then rallied to it their future 3 day rally numbers only to come back to retest their previous day low.

Monday will be a Sell day. Based on today's action I would be looking for a confused day

Monday August 21<sup>st</sup> 2017

Today was a Sell day. Markets retested their BDL and some nearly reached their Violation levels. Then the rally started.

Tomorrow will be a SS day. There is plenty of room for the rally to continue, However once the day session opens above the BDL then the decline could start at any time.

Thursday August 24<sup>th</sup> 2017

Today was a Sell day. Momentum did take markets lower and then they rallied in a very confused way.

Tomorrow will be a SS day. As long as we open above the BDL for the day session tomorrow then the direction could be confused.

Monday August 28<sup>th</sup> 2017

Today was a Buy day. Markets tested their previous day low and failed to go much lower as it was the TTT MA levels. The rally then started.

Tomorrow will be a Sell day. The rally is half way done, which may make for a continued confused rally.

Thursday August 31<sup>st</sup> 2017

Today was a Buy day. Over Night Markets barely produced a decline and then rallied. Day session didn't get a decline

Tomorrow will be a Sell day. What happened today is rare and markets may try to negate that by declining 1<sup>st</sup> and then rallying

Wednesday September 6<sup>th</sup> 2017

Today was a Sell day. Markets rallied and reached their TTT levels before pulling back a little.

Tomorrow will be a SS day. There is room for the rally to continue, however if we open above the BDL, the decline could start at any time.

**WE WILL ROLLOVER ON FRIDAY SINCE IT WILL BE A BUY DAY AND THE START OF A NEW CYCLE**

Thursday September 14<sup>th</sup> 2017

Today was a Sell day. Markets retested their BDL with NG dipping much lower than the others.

Tomorrow will be a SS day. NQ need to get back above it's BDL. Will it lead or will the others drag it back up. That is the question.

Tuesday September 19<sup>th</sup> 2017

Today was a Sell day. Markets were confused and threaded water all day.

Tomorrow will be a SS day. There is plenty of room for the rally to continue. However if we open above the BDL tomorrow, all bets are off and the decline could start at any time.

Wednesday September 27<sup>th</sup> 2017

Today was a Sell day. Markets were confused as they retested the BDL and then rallied again and managed to reach their TTT levels.

Tomorrow will be a SS day. There is room for the rally to continue. However if we open tomorrow above the BDL then the decline could start at any time.

Tomorrow will be a SS day. Since all markets closed above their BDL, the decline could start at any time. Let's see what the big news will do to change that

Tuesday October 10<sup>th</sup> 2017

Today was a Sell day. Markets were confused but when YM and ES nearly reached their target they really became confused with rallies and declines.

Tomorrow will be a SS day. There is room for the rally to continue before the decline starts.

Thursday October 12<sup>th</sup> 2017

Today was a Buy day. Some of the markets did follow the momentum and penetrated the Previous day High, then the decline started and finally some rally started at the end of the day.

Tomorrow will be a Sell day. There is plenty of room for the rally to continue. We may be in for some confusion.

Tuesday October 17<sup>th</sup> 2017

Today was a Buy day. All markets did produce a decline. However the day session decline for YM was very small and showing signs of bullishness.

Tomorrow will be a Sell day. There is plenty of room for the rally to continue and momentum should help.

Thursday October 19<sup>th</sup> 2017

Today was a SS day. Talk about a confused market. They all dropped like rocks but then rallied back up and only NQ failed to get back above its BDL for the day session.

Tomorrow will be a Buy day. With most markets having closed on their high's for the day, momentum may take them higher before the decline starts.

Friday October 20<sup>th</sup> 2017

Today was a Buy day. All markets did produce a minimal decline during the Globex session, however only NQ did get a decline during the day session. That could be looking as a bullish sign unless reversed during Monday's session.

Monday will be a Sell day. We could be looking for a confused session.

Tuesday October 24<sup>th</sup> 2017

Today was a SS day. Markets rallied hard but not hard enough for TF and NQ to make it above their day session BDL.

Tomorrow will be a Buy day. We should be looking for a decline but based on today's action we may be in for a confused decline.

Monday October 30<sup>th</sup> 2017

Today was a Buy day. Most markets declined and reached their TTT levels. NQ was a bit different as it reached its penetration levels then decline and used its range for the day as a goal for reversing.

Tomorrow will be a Sell day. There is room for the rally to continue but it may be in a confused way.

Tuesday October 31<sup>st</sup> 2017

Today was a Sell day. Markets did continue their rally but as expected it was confused. Only NQ reached a target.

Tomorrow will be a SS day. Will the rally continue or will the decline start early, that is the question.

Wednesday November 1<sup>st</sup> 2017

Today was a SS day. Markets continued their rally and reached their TTT levels. Then the decline started.

Tomorrow will be a Buy day. There is room for the decline to continue and momentum may help markets go lower before the rally starts.

Thursday November 2<sup>nd</sup> 2017

Today was a Buy day. Markets declined and some reached their TTT levels and some reached their Violation levels before reversing.

Tomorrow will be a Sell day. Good part of the rally is in place, therefore the rally should continue, but it could be a confused rally.

Thursday November 9<sup>th</sup> 2017

Today was a SS day. This was a very confused day. Markets declined overnight and opened below their BDL, only to rally right back above. Then a decline started only to be reversed in the second half of the day.

Tomorrow will be a Buy day. Today really performed as a Buy day. As long as we open the day session below today's high, this afternoon rally may just continue

Tuesday November 28<sup>th</sup> 2017

Today was a Buy day. Most of the decline happened overnight when markets tried to test their previous day low. Then the rally started.

Tomorrow will be a Sell day. Depending of the instrument, the rally is in place. However having closed near the highs of the day, momentum may take markets higher and then could be confused for the rest of the day.

Wednesday November 29<sup>th</sup> 2017

Today was a Sell day. All but NQ performed well for a Sell day and had a confused day. NQ took a nose dive for some reason.

Tomorrow will be a SS day. Will the others pull up NQ above it's BDL, that will be the question for the day.

Thursday November 30<sup>th</sup> 2017

Today was a SS day. Markets rallied a many surpassed their maximum TTT levels as they were trying to get NQ back to its BDL. NQ got close but then the decline started.

Tomorrow will be a Buy day. There is some room for the decline to continue, however the rally could also start at any time.

Tuesday December 26<sup>th</sup> 2017

Today was a Sell day. Slow confused day it was with markets going nowhere.

Tomorrow will be a SS day. There is room for the 3 day rally to continue, however as long as we are above the BDL at some point during the day session tomorrow, then the decline could start at any time

Friday December 29<sup>th</sup> 2017

Today was a Sell day. Markets rallied hard only to take a year end nose dive.

Tuesday will be a SS day. All markets closed below their BDL. Based on TTT they should all try to rally at least to that level.

Have a great and prosperous New Year.
