Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to with stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Monday January 8th 2018

Today was a Buy day. Momentum did take markets higher before the decline started. The decline reversed when YM and TF reached their TTT Range low levels based on the new momentum high.

Tomorrow will be a Sell day. There is room for the rally to continue, but it may be in a confused way.

Tuesday January 16th 2018

Today was a Buy day. Markets did produce a large decline. Matter of fact one tool that I don't talk about often enough, is the Standard Deviation numbers on the report. If we look at ES today the decline stopped at the MA Violation level minus the deviation, then the rally started.

Tomorrow will be a Sell day. A good part of the rally is in place which could make for a confused continuation.

Wednesday January 17th 2018

Today was a Sell day. Markets were confused to start but finally rallied hard. ES had reach TTT MA before pulling back to yesterday's close then rallied to the MA numbers again then to MA plus the Standard Deviation.

Tomorrow will be a SS day. Markets closed above their targets for tomorrow. They may continue the rally till they reach the Standard Deviation levels, however the decline could start at anytime.

Wednesday January 24th 2018

Today was a Buy day. As expected momentum did take markets higher before the decline started. It then reached Violation levels before the rally started.

Tomorrow will be a Sell day. A good part of the rally is in place which could make for a confused day.

Wednesday January 31st 2018

Today was a SS day. Markets did try to rally up to their BDL but only NQ made it with only TF coming close. The other two failed.

Tomorrow will be a Buy day. NQ and YM are at or close to their target for the decline. We could be in for a confused day as the markets that failed may try to negate their today's failure.

Thursday February 1st 2018

Today was a Buy day. Markets did produce a nice decline, then the day got really confused.

Tomorrow will be a Sell day. Except for ES, the rally is already in place. This could make for more confusion.

Friday February 2nd 2018

Today was a Sell day. Some missed to get a rally during the day session, however they all managed to get a rally for the 24hr session.

Monday will be a SS day. Markets closed way below their BDL. Again this will be a big hill to climb and we may be looking at a second 3 day rally failure. That is usually is very bearish, unless they fix it fast on the next Buy day.

Monday February 5th 2018

Today was a SS day. Markets failed again to produce a Positive 3 day rally. That is no longer bullish. However if they rally hard tomorrow and the next day they could negate that bearish signal.

Tomorrow will be a Buy day. Levels are not representative at the moment as we had a very wild day today. We need to see what happens tomorrow.

Tuesday February 6^h 2018

Today was a Buy day. This was the biggest point decline since I keep records Jan 1st 2008. Looked like exhaustion to me with this be rebound.

Tomorrow will be a Sell day. The average rally is more than in place. I can't find a comment that make sense for this market.

Friday February 9th 2018

Today was a Buy day. As I mentioned last night momentum did take markets lower before the rally started.

Monday will be a Sell day. Again the rally is more that in place, which could make for a confused day. Remembering the wild extreme swing days of 9-10 years ago, it is hard to forecast what will happen.

Wednesday February 14th 2018

Today was a Buy day. As expected momentum did take markets higher, then the decline started. Once violation levels were reached then the rally started and all levels were broken.

Tomorrow will be a Sell day. We are above TTT levels but momentum should take levels higher.

Tuesday February 20th 2018

Today was a Sell day. Markets were confused as they went to their Violation level and then rallied, only to retest these levels again.

Tomorrow will be a SS day. Some markets closed below their BDL and based on averages, they should try to get back above these levels before the close tomorrow.

Wednesday February 21st 2018

Today was a SS day. Markets rallied to their TTT levels and some even reached Violation levels or even Violation levels plus their Standard Deviation. Then the decline started.

Tomorrow will be a Buy day. The average decline is in place. However having closed near the lows for the day, momentum may take markets lower before the rally starts.

Tuesday February 27th 2018

Today was a Buy day. As expected, momentum did take markets higher and some reached their Minimum Standard Deviation Levels before the Decline started and they then reached their TTT MA Possible Range Low.

Tomorrow will be a Sell day. Again Momentum may take markets lower before the rally starts.

Wednesday February 28th 2018

Today was a Sell day. Markets retested yesterday's low, which held a few times but then finally failed and they then reached their Violation levels.

Tomorrow will be a SS day. Markets have closed below their BDL. Based on averages, we should be looking for the markets to try to rally and at least get back above the BDL.

Friday March 2nd 2018

Today was a Buy day. Markets continued their decline and reached their Violation levels. Then the rally started.

Monday will be a Sell day. Markets have already reached their Sell day targets. Momentum may take markets higher. We most likely will be in for a confused day.

Monday March 5th 2018

Today was a Sell day. Markets started confused but then rallied hard until ES reached its Maximum Standard Deviation Penetration Level and then wobbled around that level.

Tomorrow will be a SS day. We are above all TTT 3 day average levels, therefore the decline could start at any time. Having said that, Momentum may take markets higher before the decline starts.

Wednesday March 7th 2018

Tonight's number are based on the June Contract

Today was a Buy day. Markets declined overnight and reached their TTT MA levels. Then the rally started.

Tomorrow will be a Sell day. There is still room for the rally to continue based on the TTT MA levels. However this maybe a confused day.

Tuesday March 13th 2018

Today was a Sell day. Markets rallied to start and met some resistance at their TTT levels which was also Yesterday's highs.

Tomorrow will be a SS day. Markets have closed below their BDL. We have good odds that they should rally and at least get back above these levels before the close tomorrow.

Wednesday March 21st 2018

Today was a Sell day. Markets reached their Penetration levels and then went to retest yesterday's low, but closed above.

Tomorrow will be a SS day. There is room for the 3 day rally to continue, however if markets open above their BDL for the day session, the decline could start at any time.

Thursday March 22nd 2018

Today was a SS day. Markets tried to rally and nearly reached their TTT levels in the overnight session. However they missed and a hard decline started. All markets failed to get a Positive 3 day rally during the day session. This is confusing since the 24 hours session and the day session are not in sync, however since it's been 3 cycles in a row for the day session it make markets look bearish.

Tomorrow will be a Buy day. The decline is in place, therefore the rally could start at any time. Having said that since they closed near their low for the day, momentum may take markets lower before the rally starts.

Friday March 23rd 2018

Today was a Buy day. Markets are really starting to look bearish as evidenced by a failed 3 day rally and now a very strong decline.

Monday will be a Sell day. Some kind of rally got started today but based on the wild swings, momentum may take markets lower before the rally starts.

Wednesday March 28th 2018

Today was a Buy day. Markets were confused and retested yesterday's low a few times.

Tomorrow will be a Sell day. Hopefully the confusion will stop and a decent rally could ensue.

Thursday March 29th 2018

Today was a Sell day. Markets rallied and surpassed their MA violation levels and reached their MA Violation Standard deviation levels, just to pull back.

Monday will be a SS day. Based on the MA Recap there is room for the rally to continue. Having said that the decline could also start at any time.

Monday April 2nd 2018

Today was a SS day. Markets started their decline right at the start, and nearly reached their Recap MA Violation levels.

Tomorrow will be a Buy day. The decline is in place. We have 2 possible scenarios. 1st we retest today's low then rally, or the rally that started late today could just continue.

Wednesday April 4th 2018

Today was a Sell day. We did get confusion with markets declining overnight and finding support at their Violation levels. Then markets rallied to reach their Average 3 day rally MA levels.

Tomorrow will be a SS day. Having closed at or above their 3 day rally levels, the decline could start at any time. However momentum may take markets higher before the decline starts.

Monday April 30th 2018

Today was a Sell day. Markets were confused as they rallied to or passed their TTT levels and then reversed.

Tomorrow will be a SS day. As markets closed below their BDL, we know that they do have good odds to get back above these levels. However momentum may take markets lower before this new rally starts.

Tuesday May 1st 2018

Today was a SS day. Momentum did take markets to their Violation level before the rally started. All produced a positive 3 day rally for the 24hour session and only ES and YM missed the day session but not by much.

Tomorrow will be a Buy day. Momentum may take markets higher before the decline starts.

Thursday May 3rd 2018

Today was a Sell day. Yesterday's momentum did take markets lower and most reached their maximum Violation using their Deviation level. Then the real rally started and all closed above yesterday's lows.

Tomorrow will be a SS day. Has long as we open above yesterday's lows for the day session, we do have a positive 3 day rally. Therefore anything can happen.

Tuesday May 8th 2018

Today was a Sell day. As expected we did a confused day as markets retested their BDL and then rallied again.

Tomorrow will be a SS day. As long as we open above the BDL for the day session, then the decline could start at any time.

Thursday May 10th 2018

Today was a Buy day. Momentum was too strong and only the overnight session managed to produce a decline, and a small one at that.

Tomorrow will be a Sell day. The rally is already in place which could make for a confused day.

Tuesday May 22nd 2018

Today was a SS day. Markets retested yesterday's highs and failed to go higher. The decline then started.

Tomorrow will be a Buy day. There is still plenty of room for the decline to continue.

Tuesday May 29th 2018

Today was a Sell day. The day after a Holiday if often mixed up. Today the decline continued and reached Violation levels. Then a rally started again. NQ and TF managed to get above yesterday's low at some point during the day session.

Tomorrow will be a SS day. Based on averages markets should get back above yesterday's low. Having said that cycles after a Holiday are often failed.

Thursday June 7th 2018

Today was a SS day. Markets were confused most likely due to the rollover of the contract. They reached their violation levels then decline only to rally again.

Tomorrow will be a Buy day. We should be looking for some kind of decline.

As of today TF is no longer available so if you want to trade the Russell you will need to use RTY

Also the numbers for tomorrow are based on the September contract

Friday June 22nd 2018

Today was a Sell day. ES and YM reacted normally for a Sell day but the other two were confused.

Monday will be a SS day. Hopefully the confusion will get back to normal.

Monday June 25th 2018

Today was a SS day. Markets declined hard with most not making a day session 3 day rally and all surpassing all TTT levels. If we get another failed 3 day cycle in a row that could be a bearish sign.

Tomorrow will be a Buy day. There is a decline in place, therefor the late day rally could continue tomorrow.

Wednesday June 27th 2018

Today was a Sell day. Talk about confusion, markets retested yesterday's low only to rally to their TTT levels and then decline again and closed near the BDL.

Tomorrow will be a SS day. Markets should at least trade above their BDL during the day session and then anything is possible.
