Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to with stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Wednesday January 2nd 2019

Today was a SS day. Markets were confused and retested the BDL and yesterday's high twice and could brake either one.

Tomorrow will be a Buy day. We should be looking for some kind of decline.

Thursday January 3rd 2019

Today was a Buy day. Markets declined as expected and even reached Violation Levels. Then some kind of rally started.

Tomorrow will be a Sell day. The Rally should continue and hopefully not in a confused manner.

Friday January 11th 2019

Today was a Buy day. Markets tried to test yesterday's high and failed. The decline then started and when it reached TTT level it reversed and the rally started.

Monday will be a Sell day. Targets for Monday are almost reached, therefore we could be in for a confused day.

Monday January 14th 2019

Today was a Sell day. Markets were confused and all produced some kind of rally. NQ and RTY closed below yesterday's low.

Tomorrow will be a SS day. NQ and RTY do need to rally to reach yesterday's low, at which point the decline can start at any time.

Wednesday January 23rd 2019

Today was a SS day. Markets really tried to get back above their BDL and most came to within ticks and YM made it.

Tomorrow will be a Buy day. Some kind of rally started at the end of the day which could make tomorrow confusing.

Often when we get a holiday trading markets get confused for the cycle.

Wednesday February 6th 2019

Today was a Buy day. Markets retested yesterday's high a few time and tried to decline. However the decline was below average.

Tomorrow will be a Sell day. Will the confusion continue? That is the question.

Friday February 8th 2019

Today was a SS day. Markets retested yesterday's low and then a rally started. A bit late and they all failed for their 3 day rally.

Monday will be a Buy day. If the strong late day rally continues and reaches the previous BDL it could negate the failed 3 day rally.

Monday February 11th 2019

Today was a Buy day. Markets did produce a small decline to their High deviation level, then a rally started only to retest that low late in the day. They tried to negate the last cycle failure and missed the target by just a few ticks. So we will have to see if we get another failure in order to declare a possible bear market.

Tomorrow will be a Sell day. There is plenty of room for the rally to go. However momentum may take markets lower before the real rally starts.

Tuesday February 12th 2019

Today was a Sell day. Well it took 2 days but the failed 3 day rally has been negated with this rally.

Tomorrow will be a SS day. Although momentum may take markets higher, the decline could start at any time.

Thursday March 7th 2019

Today was a Buy day. Markets declined and reached their TTT MA Violation levels. They even surpassed these level to reach their TTT MA Range Possible Low to the tick before reversing.

Tomorrow will be a Sell day. There is plenty of room for the rally to continue, however it may be in a confused way.

Friday March 8th 2019

Today was a Sell day. What a confused day we had. Markets declined during the overnight session to finally reach their Violation levels during the day session. At this point markets had to rally in order to produce a rally for the day session. So they did and closed above yesterday's low.

Monday will be a SS Day. Markets will need to be above their BDL during the day session in order to produce a Positive 3 day Rally.

Wednesday March 27th 2019

Today was a SS day. Markets retested yesterday's high and failed. Then the decline started, however when the decline reached Violation levels it rallied again.

Tomorrow will be a Buy day. Being at TTT levels, the rally could start at any time.

Thursday March 28th 2019

Today was a Buy day. Markets tested the SSD and failed. The rally then started but encountered resistance at the TTT Range level which coincided with the future 3 day average cycle level. They then declined again only to rally and close at the same resistance level.

Tomorrow will be a Sell day. We are at both the Sell day level and the average 3 day cycle level. Therefore we could be looking for more confusion.

Friday March 29th 2019

Today was a Sell day. Markets did continue the rally but in a confused fashion as expected. ES reached its Standard Deviation Penetration High 3 times as it proved to be a good resistance level.

Monday will be a SS day. Markets are above both levels of Average 3 day levels. Therefore the decline could start at anytime.

Wednesday April 3rd 2019

Today was a Sell day. Markets were definitively confused. 1st level of resistance was at TTT then at TTT
Range Possible High based on the low for the day.

Tomorrow will be a SS day. There is room for the 3 day rally to continue but again we could be in for a confused day. Having said that since we are above the BDL, the decline could start at any time.

Friday April 5th 2019

Today was a Buy day. Markets were a bit confused with ES and RTY failing to produce a decline for the day session while the other 2 did. They all produce a decline for the 24 hour session.

Monday will be a Sell day. There is room for the rally to continue.

Monday April 8th 2019

Today was a Sell day. Markets tried to retest their Friday's low and all but YM survived and rallied to their overnight high.

Tomorrow will be a SS day. YM needs to get back above its BDL and probably all the other markets will drag it up above.

Tuesday April 9th 2019

Today was a SS day. Markets started their decline for the get go last night. YM did come close to produce a Positive 3 day rally but failed. All others did in both the Globex and day session.

Tomorrow will be a Buy day. There is still room for the decline to continue before the rally starts.

Thursday April 11th 2019

Today was a Sell day. Markets did continue its rally but failed to go much higher. Then markets got confused.

Tomorrow will be a SS day. There is room for the rally to continue, however as long as the day session opens above yesterday's low then the decline could start at any time.

Tuesday April 16th 2019

Today was a Sell day. As usual for a Sell day, it was a confused day as it reached a Low Deviation Penetration Level, then the confusion started.

Tomorrow will be a SS day. There is room for the 3 day rally to continue, however if we open for the day session above the BDL, then the decline could start at any time.

Today was a SS day. Momentum did take markets higher past most levels, however the decline never started.

Tomorrow will be a Buy day. Having closed on the highs of the day, again momentum may take markets higher before the decline starts.

Thursday April 25th 2019

Today was a crazy Sell day. Markets tried to go higher but failed. Then retested yesterday's low and failed. Then rallied again and all except YM made it back above yesterday's low for the day session.

Tomorrow will be a SS day. As all markets are below their BDL, we should be looking for a rally of some sort in order to reach the BDL level at some point during the Globex and the day session.

Friday April 26th 2019

Today was a SS day. Markets had to rally above their BDL. It took all day for the markets to finally drag YM above and just at the close.

Monday will be a Buy day. We should be looking for a decline and I am not so sure that the momentum to drag YM up will be helpful.

Monday April 29th 2019

Today was a Buy day. Well I was wrong and momentum was much stronger than expected. Markets reached their penetration levels before some kind of decline started. Only NQ really performed as per TTT.

Tomorrow will be a Sell day. Mill NQ's momentum affect the others?? Based on that we could be in for a confused day.

Tuesday April 30th 2019

Today was a Sell day. Markets did follow the momentum of NQ and reached their Violation levels, after which the real rally started.

Tomorrow will be a SS day. Based on today's action we should be looking for the rally to continue.

Wednesday May 1st 2019

Today was a SS day. Markets did continue their rally and Penetrated yesterday's levels, however they failed to much higher and the decline then started.

Tomorrow will be a Buy day. A bigger than average decline is in place, therefore the rally could start at any time. Having said that, momentum may take markets lower before the rally start.

Thursday May 2nd 2019

Today was a Buy day. Earlier in the session I posted on twitter that Momentum had disappeared and the rally had started. Well when the US day session opened they decided otherwise and proved that there was momentum, and they took markets to their Violation levels before rallying.

Tomorrow will be a Sell day. A good part of the rally is in place, therefore we could be looking for more confusion.

Monday May 6th 2019

Today was a SS day. Markets had to fight with their BDL. And even with this great gap down TTT prevailed and they all made it back above their BDL at the open of the day session, then a rally continued till 4PM at which time the decline finally started.

Tomorrow will be a Buy day. The Decline is in place. Therefore the rally could start at any time. However the downward momentum may take markets lower before the rally starts.

Thursday May 9th 2019

Today was a SS day. As expected the confusion was here. Markets declined overnight and the day session opened below the BDL. Therefore we should have expected that a rally was coming.

Tomorrow will be a Buy day. There is room for the decline to continue.

Monday will be a Sell day. Momentum may take markets higher, however targets have been achieved, therefore we could be in for a confused day.

Today was a SS day. ES and YM dragged the other two above their BDL and by doing that they reached their TTT target for the day. Once that was done the decline started.

Tomorrow will be a Buy day. There is room for the decline to continue, should they decide to continue.

Today was a Buy day. Markets declined and once the TTT MA targets were reached the rally started.

Tomorrow will be a Sell day. The rally is more than in place. Therefore we could be looking for a confused day, however momentum may take markets higher before the confusion starts.

Thursday May 23rd 2019

Today was a Buy day. This was a super decline as markets surpassed all possible levels including Standard Deviation levels, before reversing.

Tomorrow will be a Sell day. Some kind of rally started late in the day. Will it continue or retest today's lows before the real rally begins? That is the question.

Monday May 27th 2019

Today was a SS day. Markets were confused, however that was probably due to the holiday and the fact hat they were at TTT levels.

Tomorrow will be a Buy day. We should be looking for a decline.

Thursday May 30th 2019

Today was a SS day. Markets did try to get back to their BDL but failed, however some came to within a few tick of succeeding.

Tomorrow will be a Buy day. Since markets came close to produce a positive 3 day rally, a delayed reaction may occur before the decline starts. Again more confusion due to the holiday.

Monday June 4th 2019

Today was a Sell day. As expected momentum did take markets lower before a confused rally started.

Tomorrow will be a SS day. Except for NQ all of the others closed above their BDL. Now will the others be able to continue their rally and drag NQ back above is the question.

Tuesday June 5th 2019

Today was a SS day. The POWER of TTT worked again today as all markets rallied in order to get NQ out of its huge deficit and back to a Positive 3 day rally.

Friday June 8th 2019

Today was a SS day. Markets continued their rally and again surpassed all levels, before some kind of decline started.

Monday will be a Buy day. Will markets retest today's high before the real decline starts or will the current decline continue? That is the big question and I guess we will find out Sunday night.

Monday June 10th 2019

Today was a Buy day. News over the weekend made for the decline to be very shallow before the confused rally started.

Tomorrow will be a Sell day. The confusion will probably continue.

Tuesday June 11th 2019

Today was a Sell day. Markets were confused as expected. Penetrating yesterday's high and then retesting yesterday's low.

Tomorrow will be a SS day. As long as markets are above yesterday's low during the day session, then everything is possible. Having said that there is room for the rally to continue

Wednesday June 12th 2019

Today was a SS day. As mentioned last night, markets could go either way once they got above their BDL during the day session. All that did was to create confusion.

Tomorrow will be a Buy day. We should be looking for a decline.

PS tonight's numbers are based on the September contract

Tomorrow will be a Sell day. The rally was more than achieved today then a pullback started. We probably will be in for a confused day.

Wednesday June 19th 2019

Today was a Sell day. Markets were confused as they should be on a Sell day but the weird thing is that so many FOMC days fall on a Sell day.

Tomorrow will be a SS day. Markets are above their target for the 3 day rally, therefore the decline could start at any time.

Thursday June 20th 2019

Today was a SS day. Markets continued their rally and reached their Standard Deviation levels for Penetration. Once reached there was a pullback only to retest it again at the close.

Tomorrow will be a Buy day. We should be looking for some sort of decline.

Monday June 24th 2019

Today was a Sell day. Markets rallied at first but when RTY turned down hard, it dragged the others down. At this point only RTY is below the Friday's low.

Tomorrow will be a SS day. Some of the stronger indices should be able to drag RTY above its BDL.

Tuesday June 25th 2019

Today was a SS day. Markets didn't manage to pull RTY out of the hole. Instead RTY dragged every one lower. Having said that all other had a positive 3 day rally even for the day session.

Tomorrow will be a Buy day. Having closed near the low for the day, momentum may take markets lower before the rally starts.

Today was a Buy day. A rally started early but then reversed to retest the original low.

Tomorrow will be a Sell day. We should be looking for a rally, however last part of the day momentum may continue before the real rally starts.
