Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to with stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Today was a Buy day. Markets were not in a decline mode and ES missed by a few ticks and NQ completely failed to produce a decline.

Tomorrow will be a Sell day. When these situation happens sometimes, markets try to correct the situation on the Sell day. Let's wait and see.

Today was a SS day. Markets continued their rally and surpassed all TTT levels with the exception of some over the top Standard Deviation levels.

Tomorrow will be a Buy day. Momentum may take markets higher before the decline starts. However since tomorrow is Holiday trading, it is hard to predict the real direction.

Thursday July 4th 2019

Today was a Buy day. Markets did produce a small decline except for NQ day session.

Tomorrow will be a Sell day. The holiday confusion may take markets a bit lower for NQ to get its late decline before the real rally starts.

Friday July 5th 2019

Today was a Sell day. Markets did produce the late decline as expected and once it reached Violation levels, the rally started reaching yesterday's low before stabilizing.

Monday will be a SS day. Momentum of the current rally should help markets get back above yesterday's low, once achieved, markets could take any direction.

Monday July 8th 2019

Today was a SS day. All markets except for RTY Globex session, failed to produce a positive 3 day rally. Unfortunately this often happens after a Holiday.

Tomorrow will be a Buy day. A good part of the decline is in place, therefore the rally could start at any time.

Monday July 15th 2019

Today was a Sell day. Markets did try to continue their rally but it was very confused.

Tomorrow will be a SS day. There is room for the 3 day rally to continue, however, if we open above the BDL, then all bets are off.

Tuesday July 16th 2019

Today was a SS day. Markets tried to test yesterday's high and failed to go higher. Then the decline started.

Tomorrow will be a Buy day. There is room for the decline to continue, however the rally could start at any time.

Thursday July 18th 2019

Today was a Sell day. As expected markets did go lower and reached some Violation levels before the rally started.

Tomorrow will be a SS day. Markets are close to their 3 day rally levels. So as long as we are above the BDL during the day session, the decline could start at any time.

Friday July 19th 2019

Today was a SS day. As expected markets reached their 3 day Rally Target, then the decline started.

Monday will be a Buy day. Targets have been surpassed and the rally could start at any time. Having said that, momentum may take markets lower before the rally starts

Thursday July 25th 2019

Today was a Buy day. As expected momentum did take markets higher before the decline started. Once the decline targets were achieved, a confused rally started.

Tomorrow will be a Sell day. Good chance the confused rally will continue.

Today was a Sell day. Markets weren't confused and rallied most of the day.

Monday will be a SS day. There is little room for the rally to continue. Having said that the decline could start at any time.

Wednesday July 31th 2019

Today was a Sell day. The day was confused with some finishing below yesterday's low.

Tomorrow will be a SS day. RTY stayed above yesterday's low and may try to drag the others above in order to prevent the 3 day rally failure.

Monday August 5th 2019

Today was a Sell day. Markets did produce a rally during the Globex hours, however the decline was hard and markets closed way below Friday's low.

Tomorrow will be a SS day. There is a big hill to climb in order to get back above Friday's low. Let's see what will happen.

Tuesday August 6th 2019

Today was a SS day. Markets tried to get back to their BDL but the mountain was too high to climb.

Tomorrow will be a Buy day. Markets may try to negate this failed 3 day rally by reaching the old BDL before the real decline starts. Tough day to call.

Wednesday August 7th 2019

Today was a Buy day. Markets declined below their MA TTT Standard Deviation low, then reversed and rallied hard.

Tomorrow will be a Sell day. Markets have already rallied past tomorrow and Friday's target. Therefore we could be in for a confused day.

Thursday August 8th 2019

Today was a Sell day. It took two days to negate the failed 3 day rally, and therefore we are not yet in a bear market.

Tomorrow will be a SS day. We are above tomorrow targets, therefore the decline could start at any time.

Tuesday August 13th 2019

Today was a Sell day. Markets tested yesterday's low and failed to go much lower. The rally then started and reached some top levels for the day.

Tomorrow will be a SS day. Being above tomorrow's target, the decline could start at any time. However the late day confusion could continue for a bit.

Thursday August 22nd 2019

Today was a SS day. Markets again retested the previous high and failed, then the confused decline started.

Tomorrow will be a Buy day. Markets still have room to go down. However we do have a decline in place, so if the bulls are ready, the rally could continue.

Today was a Sell day. Markets were confused and didn't really go anywhere.

Tomorrow will be a SS day. There is room for the markets to continue the rally, however as long as we open above yesterday's low, the decline could start at any time.

Today was a SS day. As expected momentum did take markets higher, however once they reached their Penetration levels they ran out of steam after trying a few times.

Tomorrow will be a Buy day. Half the decline is in place. Today's confusion could continue.

Monday September 23rd 2019

Today was a Buy day. Markets declined and failed the test of Friday's low. The rally then started.

Tomorrow will be a Sell day. Most of the rally is in place, which could make for a confused day.

Wednesday September 25th 2019

Today was a SS Day. Markets retested their previous day low and failed. They then rallied above their BDL as expected.

Tomorrow will be a Buy day. Momentum may take markets higher before the decline starts.

Sorry for the delay but this has been the worst crash I ever experienced.

Monday September 30th 2019

Today was a SS day. ES tested it's BDL and failed. A Rally then started which managed to drag all markets above their BDL, producing a Positive 3 day rally, even for the day session.

Tomorrow will be a Buy day. Momentum may take markets higher before the decline starts.

Wednesday October 2nd 2019

Today was a Sell day. Markets did manage to produce a rally for the globex session, however they failed for the day session and closed below yesterday's low.

Tomorrow will be a SS day. Based on averages markets should try to rally back to at least yesterday's low.

Thursday October 3rd 2019

Today was a SS day. Markets did try to rally back up to their BDL but failed

Tomorrow will be a Buy day. Momentum may take markets higher before the decline starts. Having said that if it rallies back up to the last BDL it would negate the failed 3 day rally.

Friday October 4th 2019

Today was a Buy day. We did get a small decline and a big rally that negated the failed 3 day rally of yesterday.

Monday will be a Sell day. Momentum may take markets higher at first but we could be in for a confused day.

Monday October 7th 2019

Today was a Sell day. Markets gapped down at the open last night. Then it closed the gap and reached higher highs, then reversed at some TTT level. Confused day.

Tomorrow will be a SS day. Since markets are above their targets, markets may just continue the decline that started late in the day.

Thursday October 17th 2019

Today was a Buy day. Once ES tested yesterday's low and failed a confused rally started.

Tomorrow will be a Sell day. About half the rally is in place, which could make for a confused day.

Monday October 21st 2019

Today was a SS day. Most markets tried to bring YM above it's BDL, however YM failed. I guess Boeing managed to prevent YM from flying. ©

Tomorrow will be a Buy day. We should be looking for some sort of decline.

Tuesday October 22nd 2019

Today was a Buy day. Again the power of TTT. Yesterday all markets except YM made it above their BDL. Today, momentum made sure that they negated YM's failure and that level was reached, before the decline started.

Tomorrow will be a Sell day. Now momentum may take markets lower before the rally starts.

Wednesday October 23rd 2019

Today was a Sell day. As expected, momentum did take markets lower before the rally started.

Tomorrow will be a SS day. There is room for the rally to continue, however if we open above the BDL for the day session, we could be in for a confused day.

Today was a SS day. Yes the markets were confused with some retesting their BDL and some rallying.

Tomorrow will be a BDL. Again we are looking for confusion, with some markets rallying and some declining.

Today was a Buy day. ES tried to retest yesterday's low twice and failed. The rally then started.

Monday will be a Sell day. Markets are close to their targets, therefore we could be in for a confused day.

Wednesday October 30th 2019

Today was a Buy day. Amazing that when most markets reached their TTT levels, they reversed and the rally started. And that was way before the FOMC news. Who could have known??

Tomorrow will be a Sell day. The rally is in place, therefore we could be in for a confused day.

Today was a Buy day. Markets managed to produce a small decline. Then a rally started. Bullish sign after the last failure.

Tomorrow will be a Sell day. The rally has room to continue, however we may be in for a confused day.

Wednesday November 13th 2019

Today was a Sell day. Markets retested yesterday's low, and then the rally started. RTY was late to the party but made it above yesterday's low.

Tomorrow will be a SS day. The rally has room to continue. However as long as markets open above yesterday's low for the day session, the decline could start at any time.

Today was a SS day. Markets retested their BDL and failed. Then a new rally started.

Tomorrow will be a Buy day. We should be looking forward to a decline, however momentum may take markets higher before the decline starts.

Tuesday November 19th 2019

Today was a SS day. Markets were originally driven by the Russell as it needed to get to TTT level. Then markets got confused and some kind of weird decline started.

Tomorrow will be a Buy day. Markets are half way to their target, therefore the rally could start at any time.

Thursday November 21st 2019

Today was a Sell day. As expected markets were confused and retested yesterday's low a few times and before the rally started.

Tomorrow will be a SS day. There is room for the latest rally to continue, however if markets tomorrow morning above their BDL, then the decline could start at any time.

Monday November 25th 2019

Today was a Buy day. Markets gapped up last night and never looked back. I haven't used that expression for a long time but this was a typical case of TVGR. Reference the guide for the meaning of TVGR.

Tomorrow will be a Sell day. Having closed on the high of the day, momentum may take markets higher at first, then confusion may set in. Also markets may try to negate the failed decline by trying to decline past Friday's high.

Tuesday November 26th 2019

Today was a Sell day. Market momentum did happen at the open, bet then confusion followed as predicted.

Tomorrow will be a SS day. Again having closed on the high of the day, momentum may take markets higher before the decline starts.

Wednesday November 27th 2019

Today was a SS day. As expected, momentum did take markets higher, however no decline started.

Tomorrow will be a Buy day. We should be looking for a decline. However being a short day I would not expect a big one.

Thursday November 28th 2019

Today was a Buy day. Although it was a short day, markets did produce a small decline before the rally started.

Tomorrow will be a Sell day. Again this will be a short day. There is room for the rally that started to continue, however it could be confused.

Friday December 6th 2019

Today was a Buy day. Markets rallied hard form the get go and the decline was small and the day session failed to get a decline.

Monday will be a Sell day. Targets are already in place and markets may want to produce a delayed decline that was missed for the day session today. If not we the rally could surpass many levels.

Monday December 9th 2019

Today was a Sell day. Markets tried to Penetrate Friday's high and failed, then the confusion started.

Tomorrow will be a SS day. There is room for the rally to continue, however as long as we open above the BDL for the day session, the decline could start at any time.

Monday December 16th 2019

Today was a Buy day. The decline that happened Friday did reach today's targets and then a rally started. Today's rally was a continuation of Friday's rally. We still managed to get a small decline as per TTT.

Tomorrow will be a Sell day. Targets are in sight and should be reached before the confusion starts

Tuesday December 31st 2019

Today was a Sell day. Markets tested yesterday's low and failed, then the real rally started.

Thursday will be a SS day. Momentum may take markets higher, however the decline could start at any time.

Have a great New Year
