Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to with stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

### Wednesday July 1st 2020

Today was a Sell day. As expected the rally was confused with ES dropping to its StdDev MA low and rallying to its TTT Ma and Penetration High just to decline to yesterday's high.

Tomorrow will be a SS day. There is room for the rally to continue, however being above the BDL anything could happen.

# Thursday July 2<sup>nd</sup> 2020

Today was a SS day. Markets rallied to their about their TTT MA Penetration levels then a confused decline started.

Tomorrow will be a Buy day. There is room to reach the TTT MA level, however we are passed the TTT level. Therefore the rally could start at any time.

### Monday July 6<sup>th</sup> 2020

Today was a Sell day. Markets did continue their rally but it did get confused at some point. NQ was the leader at the start but it too got confused.

Tomorrow will be a SS day. TTT Recap MA still has room to go and since we did close near the highs of the day, momentum should take markets higher before the decline starts

### Wednesday July 8<sup>th</sup> 2020

Today was a Buy day. Markets declined overnight and then rallied. However markets retested the overnight low during the day session then the real rally started.

Tomorrow will be a Sell day. Markets have room to go to reach their TTT MA levels, and momentum may help to get them there.

### Thursday July 9<sup>th</sup> 2020

Today was a Sell day. ES did rally higher to its Penetration level after witch a confused day started testing its Violation low and restarted the rally again. The best trade was to short the third retest of the overnight high.

Tomorrow will be a SS day. Now we have 2 of the 4 markets that are below their BDL. Therefore most likely the strong ones will bring the weak ones back above.

#### Friday July 10<sup>th</sup> 2020

Today was a SS day. Markets were very confused with markets retesting their BDL, then rallied to Penetration levels.

Monday will be a Buy day. Momentum may take markets higher before the decline starts.

Have a great weekend.

### Monday July 13<sup>th</sup> 2020

Today was a Buy day. Again an AMAZING TTT day. We had to wait till 2PM eastern to finally get the decline that took the markets below Friday's high.

Tomorrow will be a Sell day. Having closed near the lows of the day, Momentum may take markets lower before the rally starts.

### Wednesday July 15<sup>th</sup> 2020

Today was a SS day. Some confusion was around as ES reached TTT MA Penetration then the decline started, however support was found at yesterday's high and a new rally started.

Tomorrow will be a Buy day. We should be looking for some kind of decline.

# Wednesday July 22<sup>nd</sup> 2020

Today was a Sell day. As expected it was a confused day. Markets retested yesterday's low and then rallied again to reach close to yesterday's high.

Tomorrow will be a SS day. There is room to reach TTT MA goals, however the decline could start at any time.

### Friday July 24<sup>th</sup> 2020

Today was a Buy day. Markets reached their Violation levels then a confused rally started.

Monday will be a Sell day. Based on today's confusion, I would expect more of the same.

### Have a great weekend

### Monday July 27<sup>th</sup> 2020

Today was a Sell day. Markets retested Friday's low and then a rally started. The day session opened with a gap and TVGR took over.

Tomorrow will be a SS day. ES is above its Recap target but has room to go for the Recap MA target. Having said that the decline could start at any time.

### Friday July 31st 2020

Today was a SS day. Markets tried to retest their BDL and failed, then a new rally started.

Monday will be a Buy day. Having closed on the high of the day, momentum may take markets higher before the decline starts.

Have a great weekend.

### Monday August 3<sup>rd</sup> 2020

Today was a Buy day. Markets did produce a decline for the 24 hours session but most failed in the day session. Having said that it was not a convincing rally.

Tomorrow will be a Sell day. I would not be surprised that the confused rally of today would not negate the missed decline of today before the real rally starts.

# Wednesday August 5<sup>th</sup> 2020

Today was a SS day. As expected momentum did take markets higher and TVGR took over for the day session which made the decline very confused.

Tomorrow will be a Buy day. We should be looking for the decline to continue.

### Thursday August 6<sup>th</sup> 2020

Today was a Buy day. As expected markets did penetrated yesterday's high before the decline started. Then once some reached their Standard Deviation Violation high, the rally started.

Tomorrow will be a Sell day. Some markets are above the Recap level but short of the Recap MA level. Therefore the rally has Room to go.

# Monday August 10<sup>th</sup> 2020

Today was a SS day. This was a very confused day. RTY and YM rallied while the other 2 were up and down all day.

Tomorrow will be a Buy day. We should be looking for some kind of decline.

#### Friday August 21st 2020

Today was a SS day. All rallied to pull RTY up to get back above its BDL, however it failed for the day session while the other 3 managed to produce a positive 3 day rally.

Monday will be a Buy day. Having closed near the highs of the day, Momentum may take markets higher before the decline starts

Have a great weekend.

## Thursday August 27<sup>th</sup> 2020

Today was a Buy day. Markets did manage to produce some kind of decline in both Globex and Day session. However it was a confused day.

Tomorrow will be a Sell day. We may be in for more confusion.

#### Monday August 31st 2020

Today was a SS day. Markets were confused as NQ was under TVGR all day, while the others tried to decline but were confused. However NQ finally started its decline late in the day as it reached its TTT MA level.

Tomorrow will be a Buy day. A good part of the decline is in place for all except NQ. We could be in for a confused day.

### Friday September 4<sup>th</sup> 2020

Today was a Buy day. Momentum did take markets lower but once YM reached its maximum Violation level, the rally started.

Monday will be a Sell day. Markets have nearly reached their TTT MA levels, therefore we could be in for a confused day.

Have a great weekend.

### Thursday September 10<sup>th</sup> 2020

Today was a Sell day. Markets retested yesterday's high and failed then a decline started.

Tomorrow will be a SS day. There is room for the 3 day rally to continue. However if we don't rally overnight, as long as we open above yesterday's low for the day session, then anything can happen.

### Friday September 18<sup>th</sup> 2020

Today was a Sell day. As expected confusion was here and all markets tested their Violation levels before a new rally started.

Monday will be a SS day. There is plenty of room for the rally to continue, however if we open on Monday morning day session above the BDL, then all bets are off and the decline could start at any time.

Have a great weekend.

#### Monday September 21<sup>st</sup> 2020

Today was a SS day. Markets did produce a Positive 3 day rallyt for the Globex session. However only NQ managed to back above its BDL for the day session.

Tomorrow will be a Buy day. Late day momentum may take the late day rally to get the others above the previous BDL, which would negate the failure

## Thursday September 24<sup>th</sup> 2020

Today was a SS day. As mentioned last night we had good odds of getting back above the BDL. Well it took a while but they did it and proved the power of TTT.

Tomorrow will be a Buy day. There is room for the late decline too continue.

### Friday September 25<sup>th</sup> 2020

Today was a Buy day. Markets declined to their TTT MA level and then the rally started and reached TTT Range MA level.

### Wednesday September 30<sup>th</sup> 2020

Today was a Buy day. Well markets rallied to some Penetration levels before the decline started. However once they reached Violation levels, a new rally started.

Tomorrow will be a Sell day. The rally had surpassed tomorrow's levels before pulling back, therefore we could be in for a confusing day.

### Tuesday October 6<sup>th</sup> 2020

Today was a Sell day. Markets were confused and reached some Violation level then a new decline started.

Tomorrow will be a SS day. Having closed below the BDL, we have good odds to get back above. However having said that momentum may take markets lower be for that rally happens

## Friday October 9<sup>th</sup> 2020

Today was a Sell day. Momentum and TVGR were big factors and markets just kept going higher and surpassed all levels.

Monday will be a SS day. Momentum may take markets higher before the decline starts.

Have a great weekend.

#### Monday October 12<sup>h</sup> 2020

Today was a SS day. Markets continued their rally and surpassed all levels before a mini decline started.

Tomorrow will be a Buy day. In principle we are looking for some kind of decline. Will the mini decline continue or will we retest today's high before the real decline starts. That is the question.

# Wednesday October 14<sup>h</sup> 2020

Today was a Sell day. As expected markets did retest yesterday's low. And failed to rally.

Tomorrow will be a SS day. Having closed below yesterday's low, we do have good odds of getting back above yesterday's low.

## Thursday October 15<sup>th</sup> 2020

Today was a SS day. Markets did go lower before trying to get back to their BDL. Only RTY made it.

Tomorrow will be a Buy day. Markets may try to negate the failure by reaching this cycle BDL before the decline starts

#### Friday October 16<sup>th</sup> 2020

Today was a Buy day. As mentioned last night, we needed to get back above last cycle BDL before the decline started and negate the previous cycle failure. Well as soon as NQ reached and ES reached TTT MAp the decline started.

Monday will be a Sell day. Momentum may take markets lower before the rally starts.

Have a great weekend.

# Monday October 19<sup>th</sup> 2020

Today was a Sell day. Markets gaped up last night and this morning. However the markets reversed and declined all day.

Tomorrow will be a SS day. Having closed below yesterday's low, we have good odds of at least get back to those levers.

#### Wednesday October 21st 2020

Today was a Buy day. It was a very confused day reaching TTT Deviation High MA levels then declining to TTT Deviation low level only to rally back up again to the same level and again retesting the low again.

Tomorrow will be a Sell day. We could be in for more confusion.

# Monday October 26<sup>th</sup> 2020

Today was a Buy day. Markets declined hard and surpassed all levels. Weird info is that ES the bounce was off Friday's MA violation level.

Tomorrow will be a Sell day. There is room for the late day rally to continue.

#### Wednesday October 28<sup>th</sup> 2020

Today was a SS day. Markets did produce a positive 3 day rally for the Globex session but all except NQ failed the day session as TVGR did set in.

Tomorrow will be a Buy day. The decline is already exceeded therefore the rally could start at anytime. Having said that since we did close near the lows of the day, momentum may take markets lower before the rally starts.

## Tuesday November 3<sup>rd</sup> 2020

Today was a Buy day. The 24 hour session did manage to produce a decline but all but NQ failed to decline for the day session.

Tomorrow will be a Sell day. Markets may try to negate the failure by doing the decline then rallying.

## Tuesday November 10<sup>th</sup> 2020

Today was a SS day. Markets were confused probably because NQ failed to get back above the BDL.

Tomorrow will be a Buy day. We could be in for more confusion as NQ may try to negate that failure.

## Wednesday November 11<sup>th</sup> 2020

Today was a Buy day. As expected NQ did continue to rally in order to negate the failure of the last cycle.

Tomorrow will be a Sell day. We should be looking for the rally to continue but it could be very confused.

#### Monday November 16<sup>th</sup> 2020

Today was a Buy Day. All markets managed to produce a decline during a 24 hour session however only NQ managed to do one during the day session.

Tomorrow will be a Sell Day. Based on today's bullish action we should be looking for the market to continue rallying, however it could be in a confused manner.

#### Friday November 20<sup>th</sup> 2020

Today was a Sell Day. Markets retested yesterday's High and failed to go higher. Then they retested yesterday's Low.

Monday will be a SS Day. Momentum may take markets lower before the real rally starts.

Have a great weekend.

# Tuesday November 24<sup>th</sup> 2020

Today was a Buy day. Markets didn't even try to go lower and all of them failed to produce a decline for the day session.

Tomorrow will be a Sell day. A good part of the rally is in place which could make for a confused day.

## Wednesday November 25<sup>th</sup> 2020

Today was a Sell day. Markets were confused as ES nearly reached its TTT MA level, then a new decline started.

Tomorrow will be a SS day. As long as we stay above the BDL for the day session, the decline could continue.

## Friday November 27<sup>th</sup> 2020

Today was a Buy day. Markets retested yesterday's low and failed. Then the rally started.

Monday will be a Sell day. We should be looking for today's rally to continue, but it may be in a confused way.

Have a great weekend.

Today was a Sell Day. As expected, markets tried to go higher in a confused manner and failed.

Tomorrow will be a SS Day. There is still room for the rally to continue, however the decline could start at any time.

## Tuesday December 15<sup>th</sup> 2020

Today was a Buy day. ES tested yesterday's low and failed. Then the rally started. Day session's gap stayed powerful and didn't get closed.

Tomorrow will be a Sell day. Since the rally is already in, momentum may take the markets higher before the confusion sets in.

#### Friday December 18th 2020

Today was a Buy day. We were expecting a decline and got it. But once we reached TTT Violation levels, the rally started

Monday will be a Sell day. Based on today's action, we could be in for a confused day.

Have a great weekend.

#### Monday December 21st 2020

Today was a Sell day. Once the markets declined below their BDL during the overnight session, markets had to rally back above and they did.

Tomorrow will be a SS day. As long as markets open above their BDL, then anything goes.

## Wednesday December 23<sup>rd</sup> 2020

Today was a Buy Day. The overnight markets produced a decline that reached the TTT Violation level. Then a rally started. The Day session gapped up and took all day to finally close the gap in the last minutes of trading.

Tomorrow will be a Sell day. Most likely the rally will continue but we could be in for some confusion.

## Thursday December 24<sup>th</sup> 2020

Today was a Sell day. We did get the expected confusion.

Monday will be a SS day. There is room for the rally to continue, however as long as Markets open above yesterday's low for the day session, then anything goes.

Have a great Merry Christmas Weekend.

#### Wednesday December 30<sup>th</sup> 2020

Today was a Sell day. As expected the confusion did continue. When some of the markets reached their TTT levels a new decline started.

Tomorrow will be a SS day. Month end/Year end window dressing should keep the confusion going.
