Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to with stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Tuesday July 1st 2025

Today was a SS day. Markets were confused in their rally.

Tomorrow will be a Buy day. We should be looking for some sort of decline.

Wednesday July 2nd 2025

Today was a Buy day. Markets did produce a Decline, then the rally started.

Tomorrow will be a Sell day. There is room for the rally to continue, however we could get some confusion.

Wednesday July 9th 2025

Today was a SS day. Markets did continue their rally but as expected it was in a confused way.

Tomorrow will be a Buy day. Momentum may take markets higher, however we should be looking for some kind of decline.

Thursday July 10th 2025

Today was a Buy day. Markets did produce a medium-to-small decline; then the rally started. After reaching its 3 day cycle target, the confusion started.

Tomorrow will be a Sell day. We could be in for more confusion.

Friday July 11th 2025

Today was a Sell day. Markets were very confused and retested their BDL with YM and RTY closing below.

Monday will be a SS day. Markets should rally in order for YM and RTY to at least get back above. After that anything goes.

Monday July 14th 2025

Today was a SS day. Markets did open below their BDL but managed to get back above before the close.

Tomorrow will be a Buy day. We should be looking for a Decline, however momentum may take markets higher before the decline starts.

Friday July 18th 2025

Today was a Buy day.

Momentum took markets higher before the decline started.

Monday will be a Sell day.

Based on the late day rally, we should be looking for that rally to continue. However we may retest today's low first.

Monday July 21st 2025

Today was a Sell day. As expected, the rally continued and reached Penetration level and tomorrow's TTT level

Tomorrow will be a SS day. Momentum could take markets higher before the decline starts.

Tuesday July 22nd 2025

Today was a SS day. Markets continued their late day decline from yesterday. Then once they retested their BDL a new rally started.

Tomorrow will be a Buy day. We should be looking for a decline, however late day momentum may take markets higher before the decline starts.

Wednesday July 23rd 2025

Today was a Buy day. Markets did produce a decline, however when the very small decline for the day session occurred, then the rally started.

Tomorrow will be a Sell day. Markets have nearly reached their target for tomorrow; therefore we could be in for a confused day.

Thursday July 24th 2025

Today was a Sell day. Markets did continue their rally, but in a confused way.

Tomorrow will be a SS day. There is room for the 3 day rally to continue, however the decline could start at anytime.

Monday July 28th 2025

Today was a Buy day. As expected, momentum took markets higher before the decline started.

Tomorrow will be a Sell day. Will the late day rally continue, or will we retest today's low before the real rally starts.

Wednesday July 30th 2025

Today was a SS day. Markets tried to rally, but once they all reached their BDL, the confusion started. Amazing, even with the Feds trying to mess things up we still get a Positive 3 day rally

Tomorrow will be a Buy day. The late day rally could continue, or the confusion could continue.

Friday August 1st 2025

Today was a Sell day. Markets did produce a Rally for the 24 hr session but then confusion started, and they finished below their BDL.

Monday will be a SS day. We have good odds of at least rallying above the BDL, however once accomplished, anything goes.

Monday August 4th 2025

Today was a SS day. As expected, markets rallied and reached their BDL.

Tomorrow will be a Buy day. Momentum may take markets higher before the decline starts.

Tuesday August 5th 2025

Today was a Buy day. As expected, momentum did take markets higher before the decline started.

Tomorrow will be a Sell day. We should be looking for some sort of rally.

Wednesday August 6th 2025

Today was a Sell day. Markets retested their BDL, then the rally started.

Tomorrow will be a SS day. There is little room for the rally to continue. Having said that, the decline could start at any time.

Thursday August 7th 2025

Today was a SS day. Markets continued their rally and surpassed all level. Then the decline started and surpassed tomorrow's target only to start rallying again only to close at their target for tomorrow.

Tomorrow will be a Buy day. Will the confusion continue or will the late day continue. That is the question.

Friday August 8th 2025

Today was a Buy day. Markets continued their rally and nearly reached Monday's target.

Monday will be a Sell day. There is little room for the rally to continue, however we could be in for some confusion.

Monday August 11th 2025

Today was a Sell day. Markets were confused when they retested their previous high and failed. Then a new decline started.

Tomorrow will be a SS day. As long as we open above the BDL for the day session tomorrow, then anything goes.

Wednesday August 13th 2025

Today was a Buy day. Markets did produce a small decline for the globex session but only ES and NQ did for the day session.

Tomorrow will be a Sell day. We may be in for some confusion, because of the failed decline of YM and RTY for the day session.

Monday August 18th 2025

Today was a Buy day. It was a very confused day as they tested Friday's low a few times.

Tomorrow will be a Sell day. The confusion may continue.

Tuesday August 19th 2025

Today was a Sell day. Markets rallied to start, but then a new decline started and all of them closed below their BDL.

Tomorrow will be a SS day. Based on averages. we have a 90+% chance of getting back above the BDL. However after that is reached then anything goes.

Wednesday August 20th 2025

Today was a SS day. Against the odds all markets except YM ended up wit a failed 3 day rally.

Tomorrow will be a Buy day. Markets did reach their target for tomorrow before rallying. Will they retest is the question.

Thursday August 21st 2025

Today was a Buy day. As expected, markets did try to retest their BDL. Then a confused rally started.

Tomorrow will be a Sell day. We should be looking for a rally, however will it be confused.

Friday August 22nd 2025

Today was a Sell day. As expected, markets retested their BDL and then the rally started and surpassed all levels.

Monday will be a SS day. Since markets have surpassed all levels for their SS day, the decline could start at any time.

Tuesday August 26th 2025

Today was a Buy day. As expected, markets did continue their decline and reached their TTT Violation level. Then the rally started.

Tomorrow will be a Sell day. Markets have reached their TTT levels and are close to their TTT MA levels. Therefore, we could be in for some confusion.

Wednesday August 27th 2025

Today was a Sell day. Markets continued their rally and reached their Penetration level. Then after the 4PM close the confusion started.

Tomorrow will be a SS day. Will the late day confusion continue or the decline start. That is the question.

Monday September 1st 2025

Today was a Sell day. As expected for a holiday day, markets were confused and went nowhere.

Tomorrow will be a SS day. There is room for the rally to continue, however the decline could start at any time.

Tuesday September 2nd 2025

Today was a SS day. Markets continued yesterday's decline and surpassed their Violation levels. Then they rallied to try to get the day session above their BDL.

Tomorrow will be a Buy day. Based on the late day rally, I believe they will try to negate the Day session failure by rallying above the Previous BDL. After that is accomplished, they could go either way.

Wednesday September 3rd 2025

Today was a Buy day. Markets managed to reach their TTT MA levels after they had managed to negate the failed 3 day rally. Producing a very confused day.

Tomorrow will be a Sell day. There is room for the late day rally to continue

Monday September 8th 2025

Today was a Buy day. Markets were very confused and traded most of the day between TTT and TTT MA targets.

Tomorrow will be a Sell day. There is room for the rally to continue if the confusion stops.

Tuesday September 9th 2025

Today was a Sell day. Markets continued their rally but with some confusion at the start.

Tomorrow will be a SS day. There is room for the rally to continue and momentum should take markets higher before the decline starts.
